Reducing Transportation Barriers

LIVINGSTON COUNTY CARES

Livingston CARES provides funding support for clients of county agencies experiencing poverty who cannot access transportation through traditional means or funds.

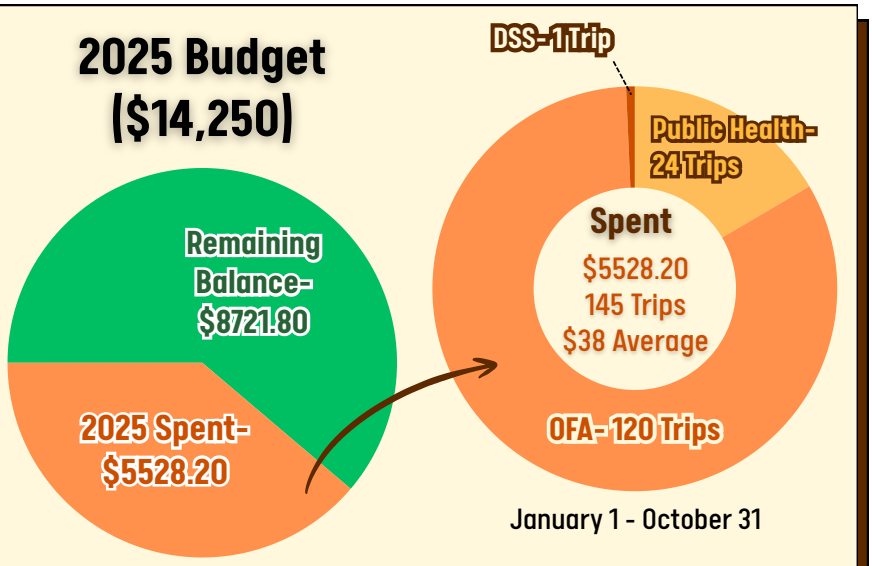

In 2025, Livingston Cares Funding has covered:

145 Trips

917 Miles of transportation

14 Unique Riders

Across 3 County departments

At the Geneseo Summer Festival, the chicken barbeque event raised $3,000. At an average cost of $38, this provides 78 additional rides for those in need. Thank you to all those involved in organizing! Your efforts have made a very tangible difference in the community.

Impact

Livingston Cares funding has played a vital role in supplementing the Office for the Aging's (OFA) transportation services where other resources are inapplicable. In the past year, these funds have covered 69 trips to the UR Noyes kidney and dialysis center, which have helped Peter, Mary, and Katherine get to their life-sustaining dialysis appointments.

Through the Public Health Department, Livingston Cares funding enabled Eloise, a patient at the CNR, to make weekly visits to her father while he was receiving hospice care. These rides provided support during an emotional significant time, and were impactful not only for Eloise, but her family as well.

Another example of the program's success is 2-year old Liam. The son of immigrant parents, Liam receives Early Intervention services in Mount Morris. Prior to Livingston Cares funding, Liam's parents were having a great deal of difficulty finding transportation, and he was missing EI services regularly. Since the conception of the fund, finding reliable rides for Liam is no longer an issue.
