INSIDE THE JOYCE AGENCY

Please Welcome Tolson Taylor!

Tolson and her friends

Her Niece, Nephew's, Daughter and Granddaughter

Tolson comes to The Joyce Agency from a another manufacturers rep agency, where she worked as an Inside Sales/Office Manager for the past 22 years. She worked directly with Wholesalers in the Virginia, Maryland, D.C., Delaware, and West Virginia territories. She absolutely loves to work with our customers because she feels that she learns so much from them.

In her free time, she is with her friends and family - who are her world. She is looking forward to her time at The Joyce Agency and continuing to learn new things everyday. She is currently a part of our quotations team, so be sure to reach out and give her a warm welcome!

Tolson Taylor - Tolson@thejoyceagency.com

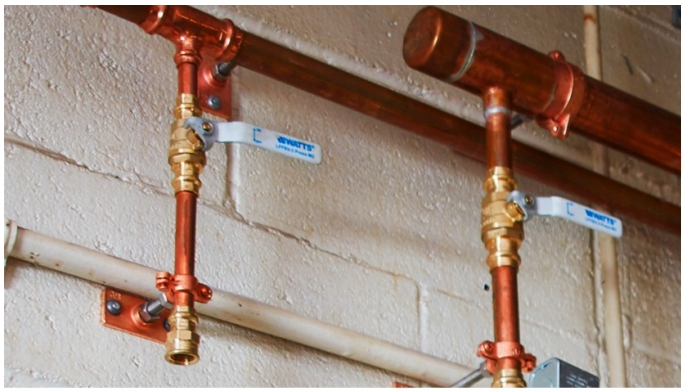

Keith Coughlin and the Golden Plunger!

Congratulations to our very own Keith Coughlin for winning the Vendor of the Year Award from May Supply Co.! This award was given to Keith for his outstanding service and dedication, going above and beyond to exceed expectations to May Supply Company and our customers. Not only did he receive the title, he was also given the coveted Golden Plunger as a token of their appreciation for all his hard work. Congrats, Keith!

NEW PRODUCT ANNOUNCEMENTS

Under PRESSure - Introducing Watts Valves with Press Connections

Make soldering a thing of the past. We now offer a comprehensive line of valves with press connections for light commercial and residential applications. These valves can be used for both new construction and renovation projects in place of a solder joint. The possibilities are endless: Join copper tubing to brass and bronze fittings without soldering; create a strong, reliable, watertight seal in a fraction of the time; avoid the fire hazard of soldering – no burn permits required; and save time and labor in both new installations and repairs.

Simply Protected: Watts High Capacity, Single Stage Lead Filtration System

Protect what matters most with this under counter high capacity filtration system, certified to remove 99.2 percent of lead from your water. This 2 GPM high flow system also reduces cysts, chlorine, odor, sand, silt, dirt and rust for safer, better tasting water. Connecting to an existing kitchen or bathroom faucet is simple. The PWDWHCL1 comes with all parts and tubing required for a standard installation. There is no need to drill holes in the countertop for a second faucet as this system connects directly to the cold water supply line. The included 7,900 gallon capacity lead-reduction filter features a Kwik-Change (TM) quarter-turn connection for easy cartridge replacement.
