

In just one day, March 15, 1876, the Lackawanna Railroad converted almost 1,000 Miles Of Track From 6' gauge To 4'-8.5". This allowed them to easily interchange with other connecting railroads

On one day, September 3, 1967, Sweden switched from driving on the left to driving on the right. Just like most other countries in the world.

When finished trails in CT and Mass come to Rhode Island, will the Ocean State be able to switch the direction of travel on their rail trails in just one day? Or will they allow crashes?
