Severe Storms Possible Again Thursday

May 10, 2023
5:30 AM

Key Messages

- Severe storms possible again Thursday afternoon into Thursday evening, especially for areas generally west of I-135

NEW What Has Changed

The threat area continues to be shifted westward.

Next Scheduled Update

- Early Wednesday evening

Severe storms possible Thursday

May 10, 2023
5:30 AM

Hazards

A couple tornadoes

Golf ball sized hail

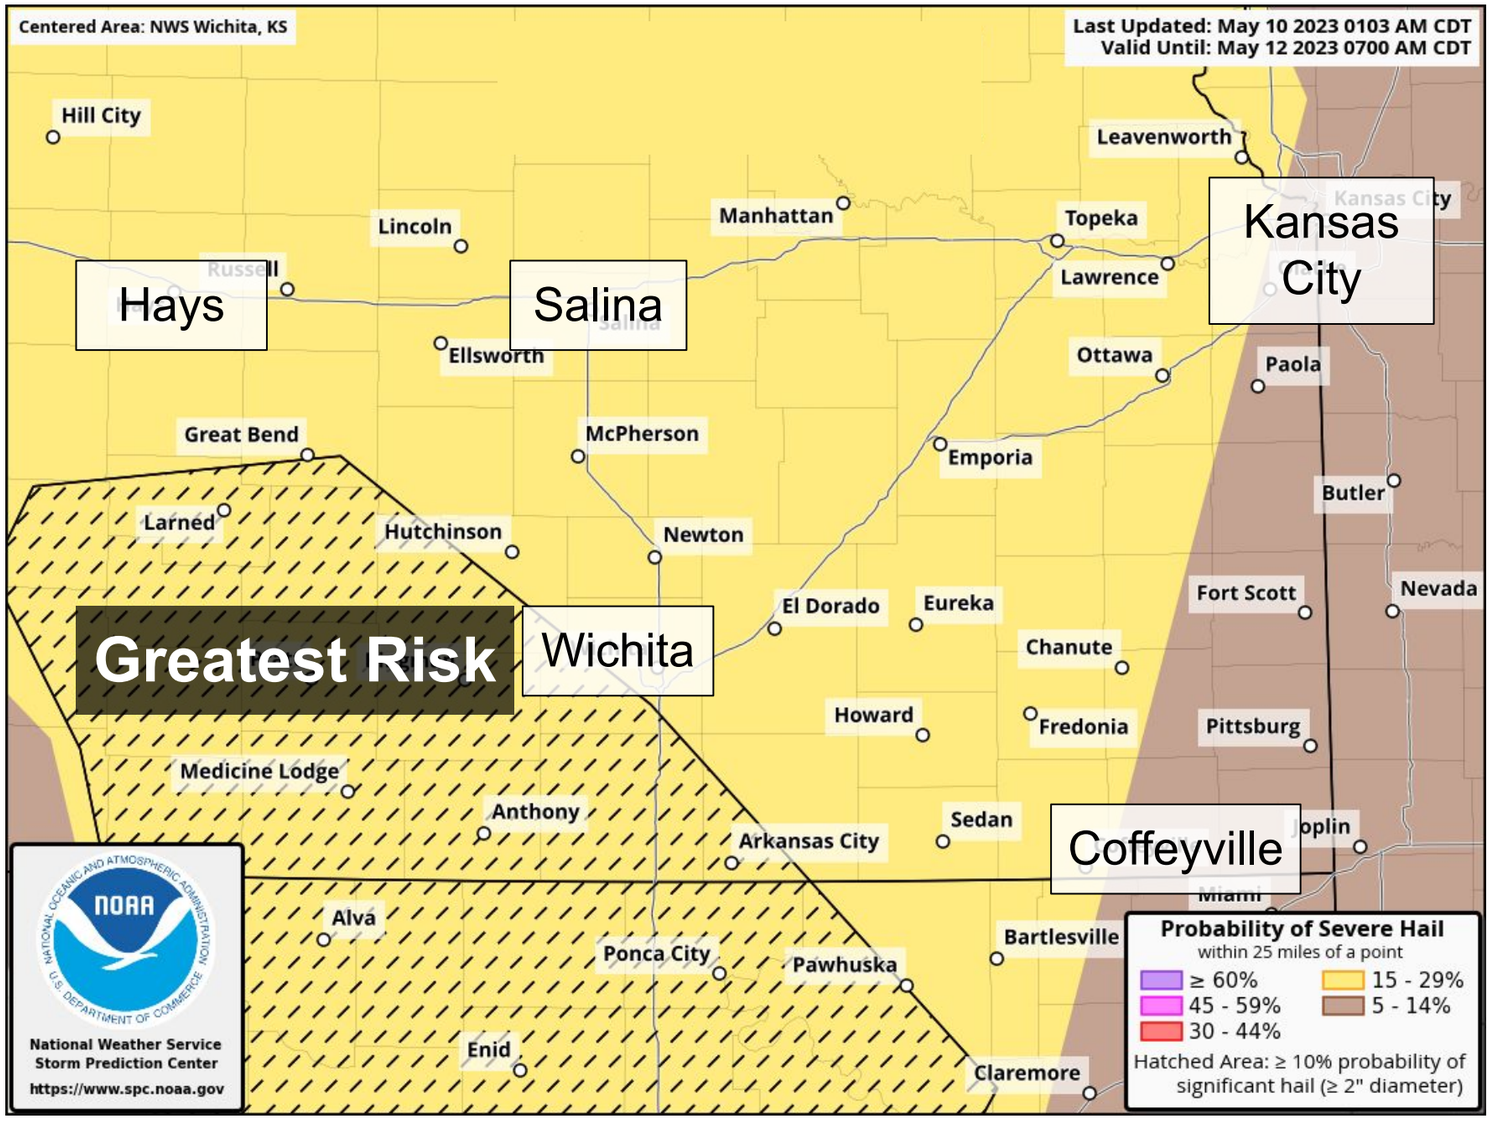

Damaging winds to 70 mph

Timing

3 pm to 11pm

Action

- Monitor the latest forecast
- Have multiple ways to receive warning information

Confidence for severe weather Thursday

May 10, 2023
5:30 AM

Timing

Low	**Medium**	High

Confidence is increasing that the better severe storm chances will be after 3 pm and could be even a couple hours later.

Location

Low	Medium	**High**

Confidence continues to increase that areas generally west of I-135 will have the greatest chance to see severe storms.

Magnitude

Low	**Medium**	High

Large hail, damaging winds and a couple of tornadoes will all be possible. However, if storms develop a bit further west than anticipated, then the tornado threat will decrease.
