Forecast confidence for Monday - Tuesday

January 7, 2024
2:45 PM

Location

Low

Medium

High

While the most severe impacts will likely be along and north of I-70, how far south impacts extend is still uncertain.

Timing

Low

Medium

High

Confidence is high that areas generally north of I-70 will start to see impacts on Monday with locations south of I-70 seeing most impacts on Monday night into Tuesday morning. There will be a lull in precipitation over southern Kansas on Monday with another round coming through Monday night into early Tuesday.

Magnitude

Low

Medium

High

Confidence is high for snow with significant blowing and drifting of snow. Dangerous whiteout visibility conditions will occur at times over portions of central Kansas.
