

# Key Messages for This Evening - Friday

July 24, 2025  
3:50 AM

**Possibility for Heavy Rainfall is increasing**, showers and thunderstorms are expected to re-develop this afternoon and becoming more numerous tonight. Some of the storms will produce heavy rainfall with 2 to 4 inch per hour rainfall rates.

**Flash Flooding is likely**, especially for locations that experienced very heavy rainfall a few days ago.

Make sure you have multiple ways to be alerted for any Flood or Flash Flood warnings issued for your location.

RISING WATER?  
SEEK HIGHER  
GROUND

NEVER CROSS  
FLOODED ROADS

# Heavy Rain and Flooding Likely
