Active Weather Through Late Tonight

April 19, 2023
5:46 AM

Severe weather and windy conditions today and tonight…

HAZARDS AND IMPACTS:

- **Severe storms anticipated late this afternoon through late tonight.**
- **Windy conditions tonight across portions of southern and eastern Kansas.**

TIMING:

- **Today's Severe: 5PM - 4AM**
- **Wind Advisory (Tonight: 6PM through 4AM)**

CONFIDENCE:

- **Today's Severe: Moderate to High Confidence**
- **Tonight's Wind: High Confidence**

ADDITIONAL DETAILS:

- **Increased confidence for storm development this afternoon along the cold front near I-70. Uncertainties in storm development remain along the dryline (along I-135) due to moderate capping expected. Confidence is high for impacts should severe storms develop along the cold front or dryline this afternoon. Confidence is high on additional storms developing along the cold front late tonight, some could be severe.**

Severe Storms Today

April 19, 2023
5:46 AM

Severe Storms Possible Late This Afternoon through Late Tonight

KEY MESSAGES

Afternoon/Eve - 5pm to 9pm:

→ If storms manage to develop, very large hail (up to baseball-size), damaging winds (70 mph), and a tornado will be possible.

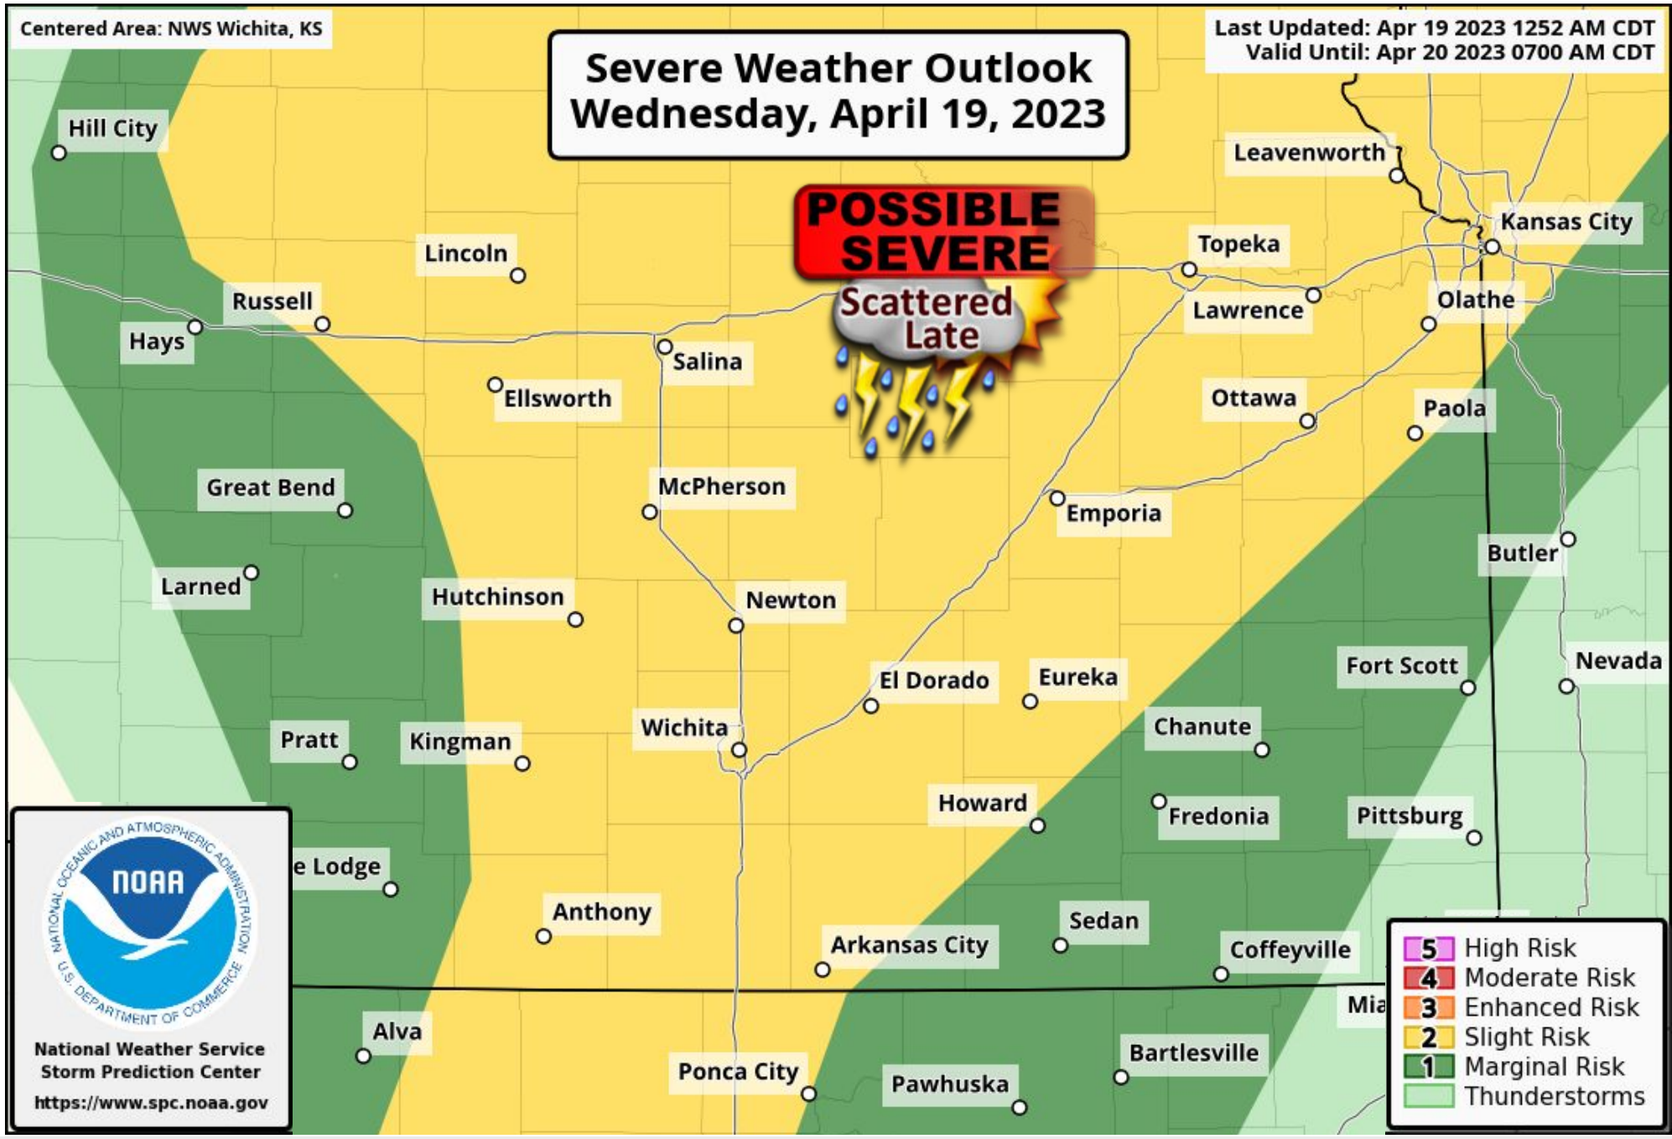

Tonight after 9pm:

→ Better chances for storms, some severe, including large hail (up to half dollar size) and damaging winds (65 mph).

Actions:

→ Have multiple ways to receive weather information and warnings.

→ Check back for updates later today.
