Forecast Confidence Tonight-Wed

February 11, 2025
3:14 AM

Location

Low Medium

High

Confidence is high for the area of highest snow accumulations to be along the I-70 corridor, where 6-8+ inches are forecast. Elsewhere, much of the area will see at least 1 to 4 inches of snow, with locally higher amounts possible along and north of US-50.

Timing

Low Medium

High

Confidence remains HIGH that snow will develop later this evening and continue into Wednesday. Snow chances are expected to end from west to east during the late morning and afternoon hours on Wednesday.

Magnitude

Low Medium

High

Confidence is HIGH for the higher snow totals and major impacts to affect central Kansas. Confidence is medium-high in lesser totals and moderate to light impacts for locations along and south of US-50.
