Sponsorship Opportunities

ADDC Webinar Series on Bioentrepreneurship

The Academic Drug Discovery Consortium

is a professional society dedicated to building the community of academic drug discovery labs and the companies, universities and government agencies that support and partner with these centers.

ADDC Members

Wide range of therapeutic strategies

- Small molecules
- Biologics
- Vaccines
- Antibodies
- Gene therapies
- Cell therapies

Activities spanning the drug discovery continuum

- Biobanks
- Biomarkers
- Drug delivery systems
- Toxicology
- Animal models and facilities
- Manufacturing
- Diagnostic tools
- Clinical trials

Individual Membership

2023 Registered Members

101 States/Provinces
63 Countries
1266 Organizations

Clinical Areas of Interest

Choices	Percentage
Neurological Disorders	45.28%
Infectious Diseases	32.33%
Cardiology	20.76%
Oncology	41.52%
Immunology	27.73%
Metabolic Disorders	29.56%
Gene Therapy	15.13%
Other	22.19%

ADDC Mission

- **Establish an interactive network** of academic drug discovery scientists and centers (currently ~150 centers worldwide) and their supporters
- **Exchange expertise** related to drug discovery programs, technologies, faculty engagement, intellectual property, regulatory agencies, industry and other public-private partnerships
  - Meetings and programs specific to academic drug discovery
  - Central repository of drug discovery centers, projects, services, partnerships, job opportunities, and events
  - Education material related to the drug discovery process and access to members who can advise on the creation of an academic drug discovery center
- **Provide a platform for partnering and collaboration** between consortium members and the life science industry including pharma, biotech, CRO's and other service providers
- **Advocate for funding of academic drug discovery**
