RE: CMS Rules RIN 0938-AT23

On September 29, 2019, CMS issued final rules effecting Rural Health Clinics effective November 30, 2019. The following highlights the rule:

- The requirement to document efforts to contact local, tribal, regional, state and Federal emergency preparedness officials in collaborative and cooperative planning efforts will be removed. However, a process to collaborate and cooperate must still be included in your emergency policies.
<https://www.federalregister.gov/d/2019-20736/p-110>
- The annual review of the emergency preparedness program policies will be revised to a biennial (every other year) requirement.
<https://www.federalregister.gov/d/2019-20736/p-111>
- The emergency preparedness program training will be revised to a biennial requirement; except in cases of initial staffing and significant policy updates.
<https://www.federalregister.gov/d/2019-20736/p-112>
- The emergency preparedness program testing (exercises) will be revised to one (1) community-based full-scale exercise, if available, or an individual facility-based functional exercise required biennially, and in opposite years, an additional exercise is required, and you may choose the exercise method (full-scale community or facility-based or tabletop).
<https://www.federalregister.gov/d/2019-20736/p-113>
- Rural Health Clinics' and Federally Qualified Health Centers' Annual Program Evaluation requirements in 42 CFR 491.11(a) and the policy review will be revised to a biennial requirement.
