

## HELPING CHAPTER MEMBERS

### A Scalable Resource

#### **Safety Novice to Expert**

The unique menu system and extensive number of resources in eSafetyLine make it valuable to large or small contractors and easy to use by everyone from clerical personnel to safety directors.

#### **Easy to Access**

Documents are exported as editable Microsoft Word documents, and reports can be exported as PDF files or spreadsheets.

#### **Safety Network and Exchange**

Materials are composed of resources created by the industry as a whole. While our safety staff developed many of the model programs, training materials and notices eSafetyLine incorporates feedback provided by industry safety professionals subscribed to the program. The website and our toll free line offer a link to that network.

#### **Easy to delegate and More time for Site Safety**

The simple interface allows administrative duties to be delegated to your office staff and assistants. The toll-free help line is available for application and content questions allowing more time for safety professionals to spend in the field.

#### **Anytime, Anywhere**

Using their laptop or PDA, you have access to this robust online safety program and company/employee records through a secure portal from any job-site.

### Industry Alerts

The program posts critical current safety information including recalls, OSHA notices and deadlines, and key information from safety organizations and other trade associations. In keeping with the Network/Exchange concept the alert feature allows posting notices by you and/or your colleagues in the industry.

### Interactive Safety Manual

Programs companies used successfully to meet OSHA and host employer requirements serve as the template for the eSafetyLine manual. And, as regulations and host employer demands change, so do these programs. If a program fails to meet any demands we will work with you to get you in compliance.

### Training Library

Targets current issues in safety and OSHA compliance with Power Points, Webinar recordings, safety talks, quizzes and activities.

### Record Keeping

Maintains Injury/Illness (OSHA 300, 300A, 301), Employee Training, and Event (tool issuance, vehicle inspections, etc.) records.

### Monthly News/ Safety Talks & Features

A new topic each month providing a guide and four safety talks to keep safety on the top of the mind and address compliance.

### Practices Database

This searchable database has hundreds of resources on every safety topic.

### Free Webinars

Periodic webinars offer helpful tips on better safety management and compliance.

## ORDER FORM

### FREE to all DISCA Members

As part of your DISCA benefits, you can receive a free subscription to eSafetyLine and all of the materials and services associated with this outstanding National program. Simply complete and return this form.
