# DIGITIZED OPERATIONS for SUSTAINABLE PROCESS INDUSTRIES

WORKSHOP

SAVE THE DATE

18<sup>th</sup> October 2018

DECHEMA, Frankfurt am Main, Germany

The workshop presents the EU perspective on digital operations in process industries and focuses on plant-wide monitoring and control of data-intensive processes.

The EU vision on digitization in sustainable process industries is presented by A.SPIRE and EFFRA. The four projects introduce their objectives and first outcomes, through technical presentations and a poster session. The main barriers and next steps toward full digitization of process operations are discussed in a panel session. The event will end with a pleasant moment for informal networking.

Attendance at the workshop is FREE, but the number of participants is limited. Register procedure will be shared soon. In the meanwhile, save the date!

Co-ORGANIZATION

The projects leading to this application have received funding from the European Union's Horizon 2020 research and innovation programme
