

FUDIPO EU PROJECT: 18-month-review meeting at Brussels, 24-25 April 2018

After one year and a half from the project beginnings, the consortium met last 24-25 April to present the project's progress and new advances to the reviewers.

First-day presentations were about the state of the project implementation in different case studies. Demonstrator leaders presented the progression status, new advances, drawbacks and to-do actions for future months. Finally, partners were divided into different working groups during workshops to discuss about the states of different ongoing tasks to evaluate actions done and plan future actions. Consortium members took advantage of this to improve communication and plan actions if needed.

The second day, different partners presented new advances and tasks evolution to reviewers. The day started with an initial presentation of deliverables and milestone status. Then, the chief engineer presented a summary of demonstrator status and technology development. Idener gave a presentation about the dissemination activities done until date and future activities according to dissemination plan. The financial status was presented by the project coordinator and presentations about the study cases were presented by demonstrator's leaders. Mälarenergi, Tupras, MTT, Billerudkornäs and ABB presented an overview of the tasks progression. BestWood/Fraunhofer and Tieto also presented advances in sensor and architecture development respectively.
