

Reliable, simple, effective NPWT

Cardinal Health™ CATALYST™ — the power of simplicity in a trusted NPWT device

It all comes down to finding innovative ways to enhance patient care without escalating costs. With a streamlined interface and additional features such as Twist N' Connect™, dual-lumen technology, and additional alerts, Cardinal Health™ CATALYST™ makes negative pressure wound therapy simple — both clinically and economically.

Dual-lumen tubing

technology maintains and monitors pressure at the wound site. Tubing is designed to continually remove exudate while providing continuous NPWT.

Twist N' Connect™

canister port connection supports easy and secure connection.

Full canister and blockage alert

emits an audible and visual alert to ensure patient is receiving constant therapy.

Simple design

for easy therapy initiation and troubleshooting for optimal patient care.

Reduce complexity for clinicians, patients and caregivers

- Approachable, simplistic design empowers providers to quickly assess and make decisions
- Single button controls for easy navigation
- Small, quiet and lightweight design is discreet and portable
- Unique sensor technology detects accurate pressure reading from the wound site throughout device

Improve care without increasing costs

- Proven technology with over 1,000,000 therapy days
- Save 30-50 percent more than other market leading devices¹
- Discharge solutions to reduce patient wait time and daily costs

Receive ongoing service and support

- Customized tools and training tailored to each facility
- 24/7 customer and clinical support
- Streamlined discharge process for clinical staff

Cardinal Health™ CATALYST™ — Your simple solution to NPWT.

We help you balance your clinical and financial goals with an NPWT solution that delivers reliable patient care and economic value.
