Mobility-Fall prevention

LOW TO MODERATE RISK

- Offloading design redistributes pressure away from high risk pelvic area
- Contoured seat with adjustable lumbar cushion for individual support and comfort
- Versatile design for wheelchairs (all sizes), easy chairs, and general seating

posture·mate HB • **posture·mate WC**

MODERATE TO HIGH RISK

- Advanced support system for chair bound individuals who easily fatigue and/or lack torso and head control
- Ergonomically designed to combat static load and prevent leaning, sliding, and slumping
- Pressure injury prevention and postural support
- Posture alignment reducing musculoskeletal strain

Shown with
optional arm covers

posture·mate G

MODERATE TO HIGH RISK

- Pressure injury prevention by immersion seating, and contoured foam back support
- Clinically proven to prevent falls from the chair
- Lower gradient sloped with extremity protection by heel offloading
