

Manitoba GreenMatter Report

It's been a wet fall here in Manitoba as many parts of the province are close to setting rainfall records for September if they haven't already. It has made completing aeration and projects a bit more difficult than usual but it sounds like many Superintendents are finding windows of opportunity to get their work done. Hopefully things get a chance to dry out before the snow falls as the disease pressure will be pretty high with the weather we have been having.

The MGSA had a successful season of monthly meetings hosted at The Players Course, St. Boniface Golf Club, Lake of the Sandhills Golf Club and Clear Lake Golf Course. The Annual Turfgrass Research Tournament hosted by Dave Linstead at Bel Acres once again raised a significant sum for turfgrass research. To wrap up the season the MGSA Golf and Turf Conference will take place at the Canad Inns Polo Park in Winnipeg on November 13th – 15th where there will be a strong speaker lineup once again.

Hopefully everyone gets a chance to complete their fall tasks prior to snowfall and we can enjoy a bit of a break over the winter.

Looking forward to seeing everyone at Cabot Resort for a great 2019 Fall Field Day!

Braydon Gilbert
CGSA Manitoba Director
