

CGSA Quebec Report

Winter came very fast to many regions in Quebec. Golf courses scrambled to put down products and get winter protection in place. Some courses did not finish everything they had to do. The snow came early but very little in the Montreal region. We had some ice cover and more snow followed. North of the city saw a lot of snow but also had ice cover that formed before the snow arrived. The Quebec City region saw a lot of snow but very little ice. We have had very cold weather the last couple of weeks throughout Quebec. We will know in 6 weeks or so as to our fate.

In Quebec the Summit of Golf returned with a partnership with all the provincial golf associations and the club managers. We had 3 days of education and sitting together putting ideas forward to make golf better. Golf Quebec organized this event with the collaboration of all the associations. Merci Golf Quebec.

I am looking forward to "The Canadian Golf Course Management Conference" March 4-7 in Banff. Great speakers and what a great venue. Safe travels everyone and we will see you in Banff.
