

MULTIMAT GOLF COURSE PROTECTION SYSTEM NOW AVAILABLE IN CANADA

Rain, Sleet, Snow??? we can't change the weather – but we can help!!!

The MULTIMAT developed by Fairway Products was originally designed to protect golf course fairways during the winter months. However, as we're well aware, the summer and shoulder months can be wet and cold too!! The patented specially formulated plastic Mat allows golf clubs to **stay open** and **increase revenue** even when the course is wet or frozen during periods of adverse weather.

It is completely portable and can easily be laid over any fairway and provides a consistent playing surface when roots of divots will not grow back due to low temperatures. Golfers of all playing abilities have welcomed the way MULTIMAT allows them to enjoy their sport throughout the year.

British Open venues at the Royal St George's, Sandwich, the Royal Liverpool, Hoylake and Royal Portrush have used MULTIMAT to protect their courses prior to the Opens of 2003, 2006, 2011, 2014, 2019, and hundreds of golf clubs are now seeing the benefit of the MULTIMAT System.

Don't just take our word for it. Here's what people are saying about MULTIMAT.

Dear Sirs

Just to confirm our order for 300 MULTIMATS.

As a regional qualifier for the Open, it is of prime importance to keep the course in good condition. This year the course has been "par excellent" which in part was down to the use of your product during the winter months. Members seem to have no complaints in using the mats which are used for both tee and fairway shots. The use from the tee giving us the benefit of almost a full length course through the winter.

*Keep up the good work. **Graham Tennant (Secretary), Renfrew Golf Club***

Dear Jason,

I've played off many different winter fairway mats but the MULTIMAT is definately the best for shots and action. The ball stays in position on slopes and the mat stays put during shots.

Simon Reeves (PGA Professional)
