

Please remember: If in doubt, stay out!

- If any of your students have any symptoms (or have been tested) for COVID, please keep them home (along with any other siblings).
- If anyone (mom, dad, siblings, grandparents, etc.) in your household has been tested for COVID, please keep all students home until results have been received.
- Please be sure to contact the school office if you have a student who has been given a COVID test.
- If your student has had direct contact (even outside of school) with someone who is being tested for COVID, please have your student quarantine until those results have been received. If those results are negative, your student is welcome to come to school. If they are positive, your student should quarantine for 14 days from the exposure.

If you have any questions, please contact us.
