Network analysis provides a valuable framework for understanding system of care functioning through empirical and visual representations of relationships across community agencies. This Web event will bring together perspectives from local, state, and national levels to discuss how network analysis is applied to examine and inform community partnership and service implementation. Presenters will:

- Describe what network analysis is, and why it is an informative tool for understanding systems of care for children's mental health
- Share their experiences in conducting network analyses across multiple settings
- Highlight some preliminary findings about collaborative relationships and placement of key members in the networks
- Provide real-life examples of how stakeholders have used the data to identify needs and areas of growth within their systems

### PRESENTERS

#### **Grace Huang**

CMHI National Evaluation team,  
Westat

**Joy Kaufman, PhD** and  
**Tim Marshall, MSW, LCSW**  
Connecticut System of Care

**Margo Candelaria, PhD** and  
**Tiffany Martoccio, PhD**

University of Maryland,  
School of Social Work

### MODERATOR

#### **Abram Rosenblatt, PhD**

Project Director,  
CMHI National Evaluation, Westat
