

**Summer Astronomy Institute:**

# Space Science and the NGSS

***Bring the universe into your classroom!***

This 4-day Institute will cover classroom tested, inquiry-rich activities designed to help students actively investigate space science phenomena through three-dimensional learning supporting the Next Generation Science Standards.

Workshop strands include: Astronomy and the NGSS, tools of the astronomer: telescopes and spectrometers, exploring the solar system, cross-curricular and STEAM integration, solar and lunar eclipses, stars, and **MORE!**

Two semester units of academic credit available through The University of the Pacific.

In addition to four days of activities, participants receive The Universe at Your Fingertips 2.0 (\$30 value), a set of 12 Galileoscopes (\$300 value), materials to help implement classroom investigations, and more!
