

### **CAMP INVENTION – 1st-6th grade**

Developed by the National Inventors Hall of Fame, Camp Invention is nationally recognized and offers students an exciting environment with no wrong answers, lots of brainstorming, and an opportunity to build confidence, dream, and create their inventions. Under the leadership of Hyer Elementary's CIT, Lindsey Estill, campers will explore connections between science, technology, engineering, math concepts, and innovation. Camp Invention is a high energy, hands-on STEM camp. Students will love what's in store this year:

- **Pop-Up Venture-** Big ideas pop up as children design their own mini pop-up business! Building their entrepreneurship skills, campers make strong financial decisions and develop creative marketing strategies to attract customers and achieve their business goals.
- **Catching Air-** Children ride through physics, engineering, invention and art as they build their own skate park complete with ramps, bowls and rails!
- **Invention Celebration-** Students engineer light-up party hats, invent a Party Assistant to help with their plans, explore the science of color with bubble art banners and experiment with sound vibrations through the creation of a musical instrument.
- **MimicBot-** Children show their unique style when they transform a MimicBot into a one-of-a-kind animatronic stuffie using inspiration from nature!

Space is limited, register early! Students should bring a lunch & drink each day.

---

Instructors: Lindsey Estill, Maria Warren, and Cindy Gillean

Date and Time: Tues.-Thurs. June 20-22: 9:00 a.m.- 4:00 p.m.

Location: University Park Elementary

3500 Lovers Lane, Dallas 75225

Tuition: \$425, To register call HPISD's Academy for Lifelong Learning: 214-780-3380
