

# WORKPLACE EMERGENCY SEMINAR

Is YOUR workplace well-prepared to ensure employee safety in a variety of situations ranging from **inclement weather and medical emergencies** to **active shooter** situations?

Workplace Safety has evolved from fire extinguisher training and proper lifting techniques to concerns about physical and emotional health as well as outside threats.

To learn more about emergency procedures, security plans, and threat analysis, please plan to attend this informative seminar. A facilitator from the U.S. Department of Homeland Security will advise local businesses on the most common vulnerabilities in the workplace and how to address them.

## WORKPLACE EMERGENCY SEMINAR

9:30-11:30AM | Wednesday, June 20
