Myasthenia Gravis

Myasthenia gravis comes from the Greek and Latin words meaning "grave muscular weakness." The most common form of MG is a chronic autoimmune neuromuscular disorder that is characterized by fluctuating weakness of the voluntary muscle groups.

Heavy Metal Excretion in the Urine After an IonCleanse by AMD Session

Many practitioners have shared that they believe the biggest detox effect does not occur during the actual IonCleanse by AMD session but rather after the session is completed. Dr. Dietrich Klinghardt comments on this during a Klinghardt Academy event: <https://youtu.be/I6lMGdHOI6A>

AMD conducted a preliminary study evaluating metal excretion in the urine before and after one IonCleanse by AMD session.

Preliminary Study
