OSHER LIFELONG LEARNING INSTITUTE AT NORTHWESTERN UNIVERSITY

OLLI NU TECHNOLOGY COMMITTEE

OLLI's Technology Committee has a dual mission:

1. **Tech Training**
2. **Organization-Wide Technology Consulting**

Our Tech Training mission includes:

- All OLLI members — developing and establishing programs to assist OLLI members in acquiring essential skills that enhance abilities to fully participate in OLLI programs.
- Coordinators — training for new and returning coordinators (in coordination with the Coordinator Development Committee)
- New and returning members — providing technology education (in coordination with the Membership Enrichment Committee)
- Provide one point of contact for OLLI members requiring technology assistance.
- The goal is to make it easy for people to use technology so it isn't a barrier to member participation or for someone who wants to be a coordinator.

Organization-Wide Technology Consulting includes:

- Working with the OLLI staff on improving technology platforms and classroom equipment
- Working with OLLI staff and committee chairs and vice-chairs to make MyOLLI as functional and user-friendly as possible.
- Consulting with OLLI committee chairs and vice-chairs to understand what information would be helpful to them and how technology could be employed in carrying out their mission.
- Consulting with OLLI staff and committee chairs and vice chairs to consider how AI could be incorporated into OLLI functions and training.

If these activities sound interesting to you, we'd love to hear from you. Please complete this form and someone from the Tech Committee will contact you.
