City of Santa Monica | Pier Bridge Replacement Project

January Construction Update

Exploratory Potholing for Temporary Pedestrian Ramp

Construction Period: Monday, Jan. 5 2026 for approximately four weeks
Locations: Along the south side of the Pier between Ocean Front Walk and Moomat Ahiko Way
Description: Potholing for temporary pedestrian bridge

In preparation for construction of the temporary pedestrian bridge the contractor is expected to begin potholing at several locations on the south side of the Pier beneath the bridge. The potholing is expected to begin on Monday, Jan. 5, 2026 for approximately four weeks.

Potholing consists of drilling small test holes in the pavement to confirm existing underground infrastructure. This allows crews to see exact utility locations and soil conditions.

No closures are necessary for this activity, and business access will not be impacted.

Construction schedules are subject to change. Please visit the project website at www.santamonica.gov/pierbridge for the most up-to-date work schedules.

City of Santa Monica | Pier Bridge Replacement Project

January Construction Update

Fencing for Temporary Vehicle Ramp Construction

Construction Period: Monday, Jan. 5, 2026 through June 2026
Locations: On the north side of pier near future temporary ramp location
Description: Installation of fencing to create protected work zone

The contractor is expected to install temporary fencing on the Pier to create a protected work zone while crews construct a temporary vehicle ramp to maintain access to the Pier during bridge construction. The fencing will be installed as early as Monday, Jan. 5, 2026 and will remain in place for approximately five months while the temporary ramp is constructed. **No closures are necessary for this activity, and business access will not be impacted.**

Construction schedules are subject to change. Please visit the project website at www.santamonica.gov/pierbridge for the most up-to-date work schedules.
