Join WA-STELLAR and Become a Master Teaching Fellow

Get paid to take your STEM teaching and leadership to the next level!

About

Washington STEM Teachers Engaging in Leadership, Learning, and Research (WA-STELLAR) is a multi-year, National Science Foundation-funded project to develop and support a network of STEM teacher leaders in Washington state.

Benefits

- Receive a $10,000 annual stipend for five years
- Improve STEM education in Washington state
- Engage in professional learning opportunities
- Network with STEM teacher leaders across the state
- Collaborate with community and industry partners
- Lead instructional change efforts in your school/district

STEM Leadership Responsibilities

1. Complete STEM leadership training, including courses through the CWU STEM Leadership program
2. Engage in WA-STELLAR network activities, including:
   - Develop and implement STEM education-focused collaborative inquiry projects in your school/district
   - Attend yearly (in-person) summit and intensive training for one weekend each August
   - Attend monthly (virtual) field support meetings during the academic year
   - Participate in the project online portal

Eligibility Requirements

- K-12 STEM teacher at a high-need school
- Current Washington state teaching license
- Completed master's degree in education or a STEM discipline (or within one year of finishing)
- U.S. citizen, U.S. national, or permanent resident alien
