

2022/23 Winter Propane Market Update

December 7, 2022 | Washington, DC

(Inventory data as of 12/02/22; residential heating fuel prices as of 12/05/22)

PADD 1A (New England) propane inventories above the 5-year range

New England (PADD 1A) ending stocks of propane and propylene
million barrels

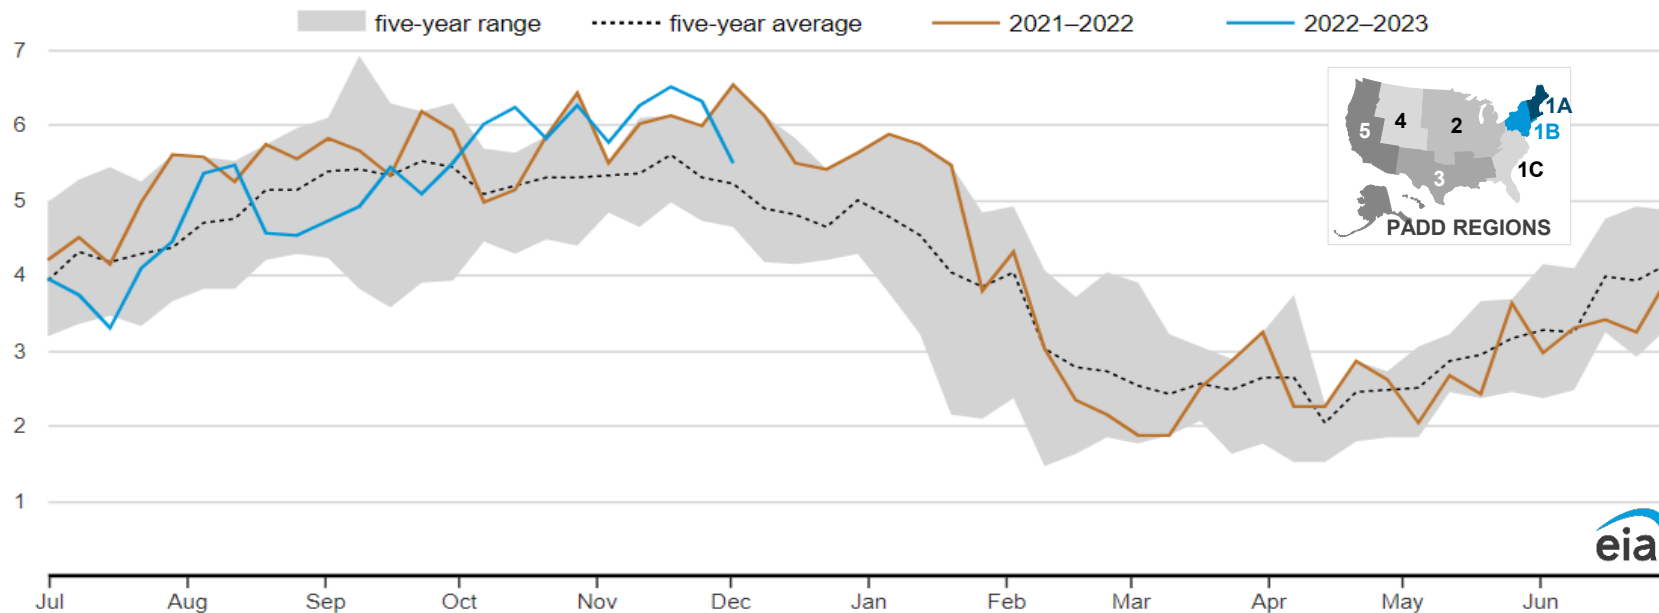

Source: U.S. Energy Information Administration, *Weekly Petroleum Status Report*, December 07, 2022

Note: PADD 1A is composed of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

data through December 2, 2022

PADD 1B (Mid-Atlantic) propane inventories above the 5-year average

Central Atlantic (PADD 1B) ending stocks of propane and propylene
million barrels

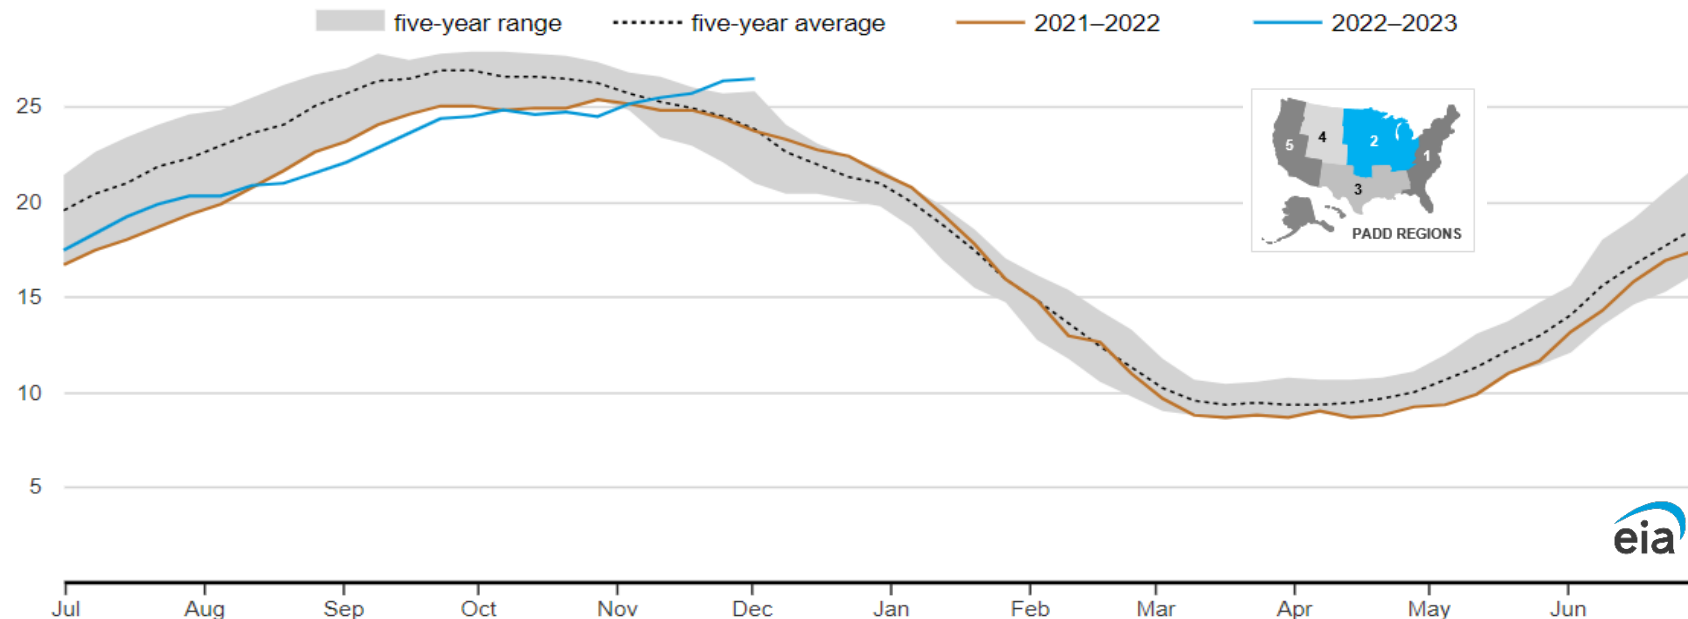

Source: U.S. Energy Information Administration, *Weekly Petroleum Status Report*, December 07, 2022

Note: PADD 1B is composed of Delaware, District of Columbia, Maryland, New Jersey, New York, and Pennsylvania.

data through December 2, 2022

PADD 2 (Midwest) propane inventories above the 5-year range

Midwest (PADD 2) ending stocks of propane and propylene
million barrels

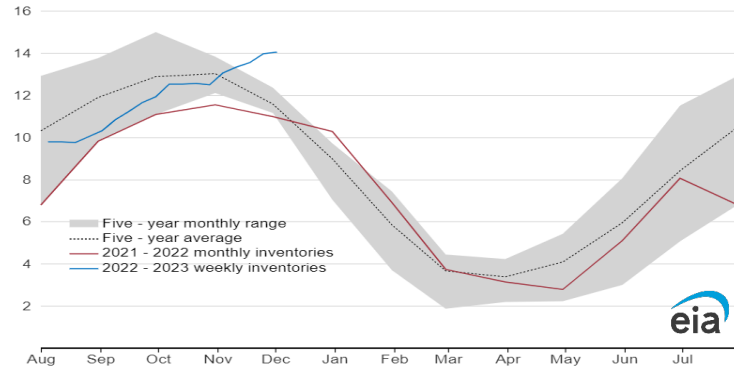

Source: U.S. Energy Information Administration, *Weekly Petroleum Status Report*, December 07, 2022

Note: PADD 2 is composed of Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, Tennessee, and Wisconsin.

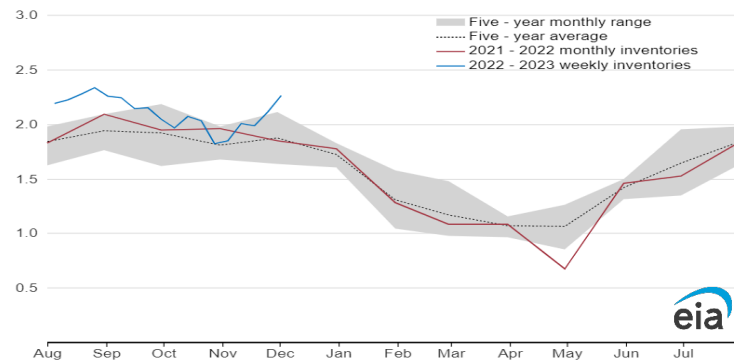

data through December 2, 2022

Selected state propane* inventories

Kansas propane/propylene stock at refineries, terminals, and natural gas plants (not pipelines)
million barrels

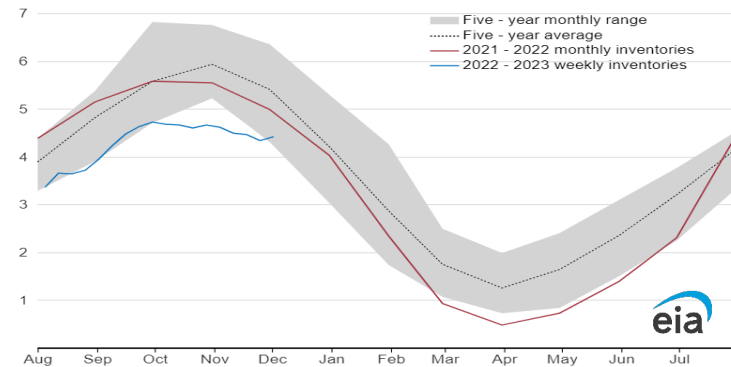

Source: U.S. Energy Information Administration, *Petroleum Supply Monthly and Weekly Petroleum Status Report*
Illinois, Indiana, Ohio propane/propylene stock at refineries, terminals, and natural gas plants (not pipelines)
million barrels

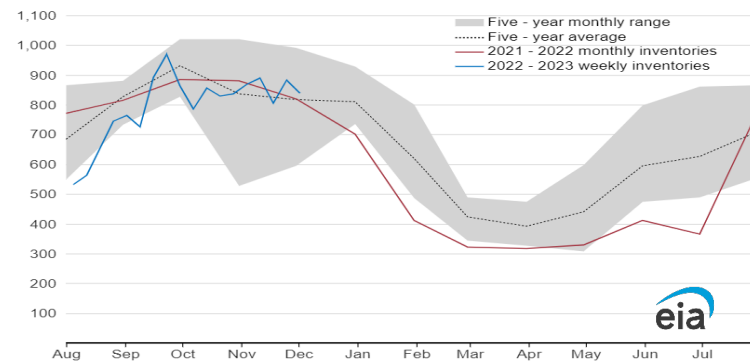

Source: U.S. Energy Information Administration, *Petroleum Supply Monthly and Weekly Petroleum Status Report*

Michigan propane/propylene stock at refineries, terminals, and natural gas plants (not pipelines)
million barrels

Source: U.S. Energy Information Administration, *Petroleum Supply Monthly and Weekly Petroleum Status Report*
Iowa, Minnesota, Wisconsin propane/propylene stock at refineries, terminals, and natural gas plants (not pipelines)
thousand barrels

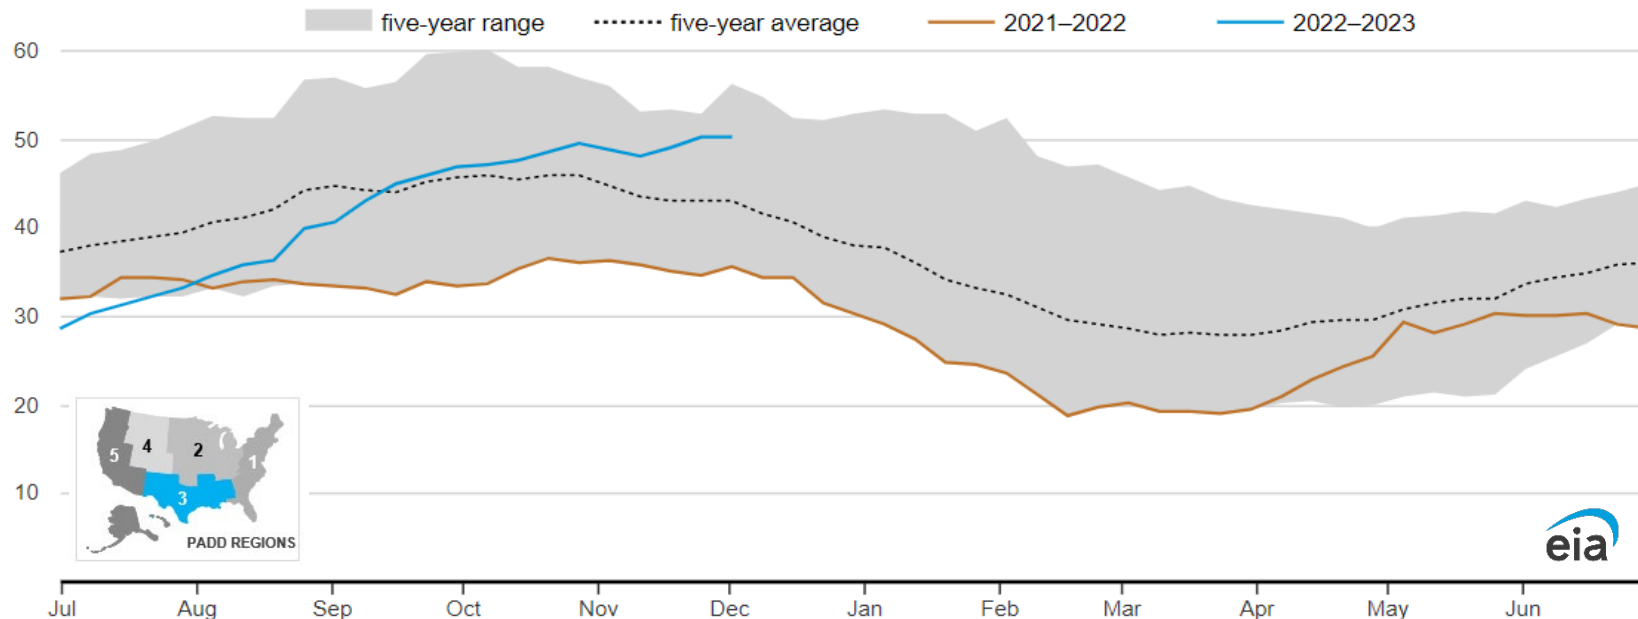

Source: U.S. Energy Information Administration, *Petroleum Supply Monthly and Weekly Petroleum Status Report*

Data source: EIA, *Weekly Petroleum Status Report*, data through December 2, 2022

*propane/propylene for fuel use only

PADD 3 (Gulf Coast) propane inventories above the 5-year average

Gulf Coast (PADD 3) propane/propylene inventories
million barrels

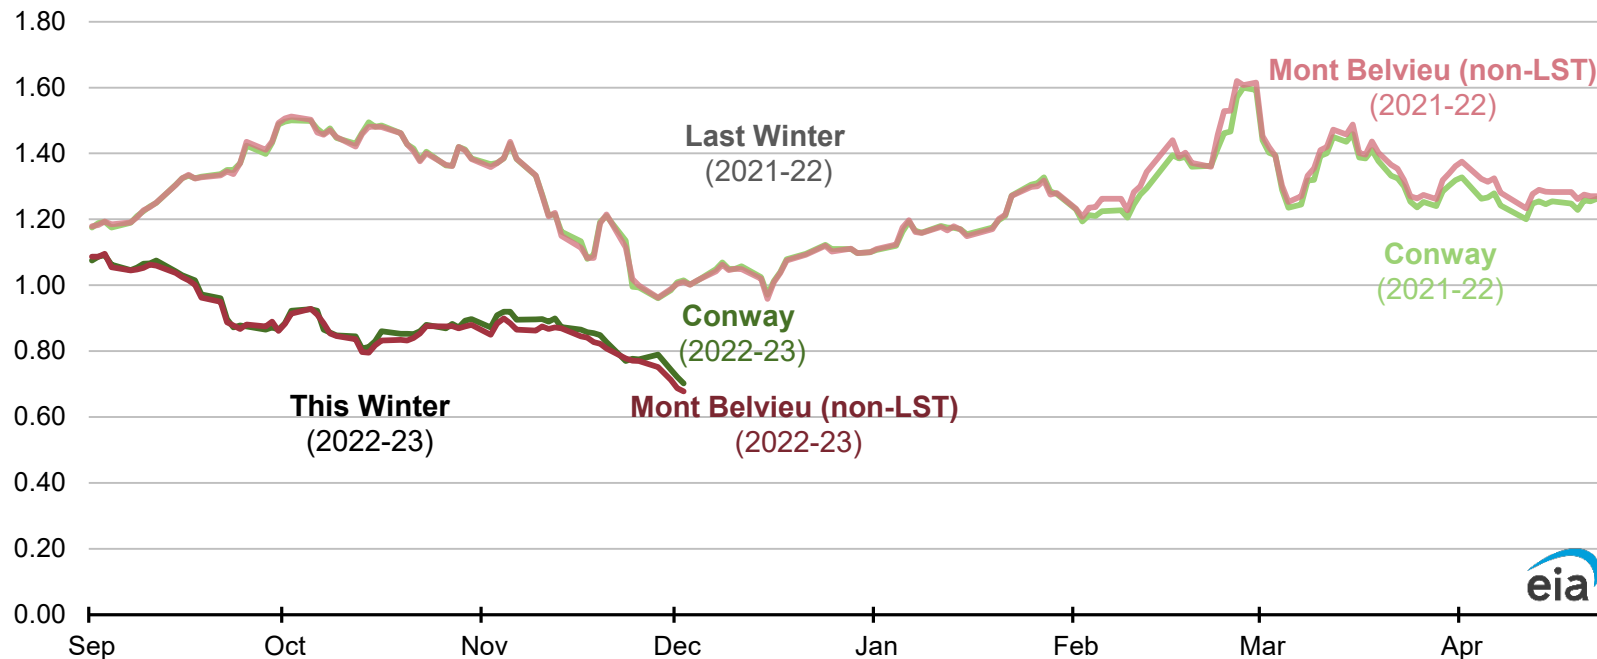

Source: U.S. Energy Information Administration, *Weekly Petroleum Status Report*, December 07, 2022

Note: PADD 3 is composed of Alabama, Arkansas, Louisiana, Mississippi, New Mexico, and Texas.

data through December 2, 2022

Conway, KS spot prices have returned to a ~3¢/gal premium over Mont Belvieu, TX

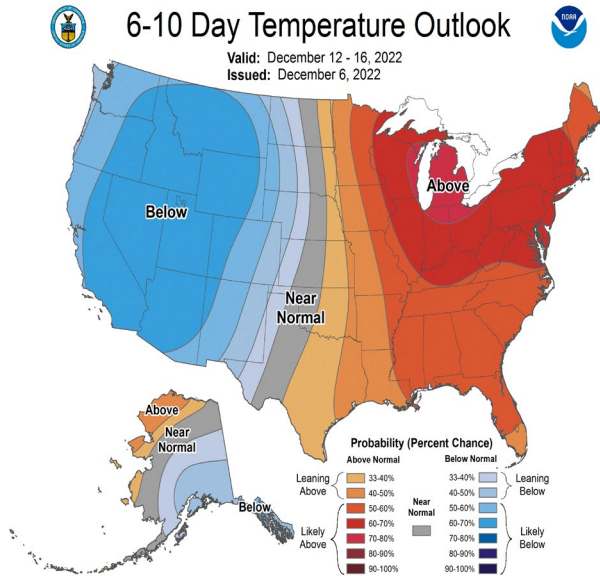

Propane spot prices (Conway, KS and Mont Belvieu, TX)
dollars per gallon

Data source: Bloomberg, L.P. data through December 6, 2022

NOAA's projected temperatures:

December 12 – Dec. 16, 2022, and December 14 – Dec. 20, 2022

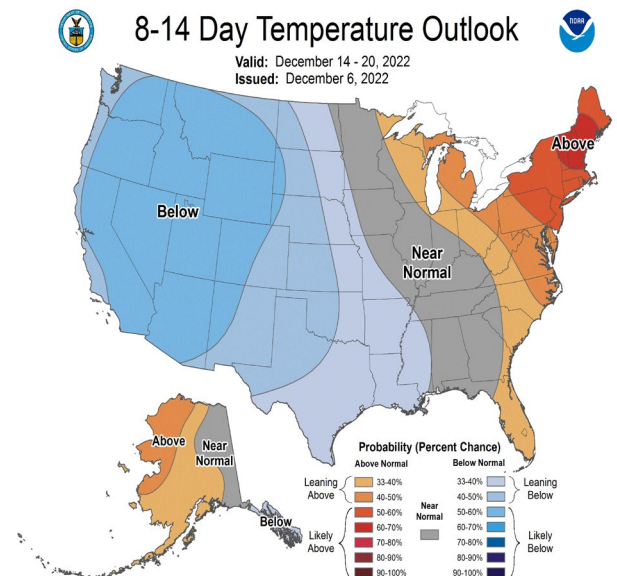

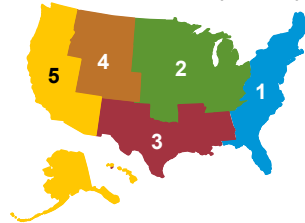

A = temperatures above normal

N = equal chance that temperatures are above normal, normal, or below normal

B = temperatures below normal

Data source: [NOAA](https://www.noaa.gov), Dec. 6, 2022

Petroleum Administration for Defense Districts (PADDs)

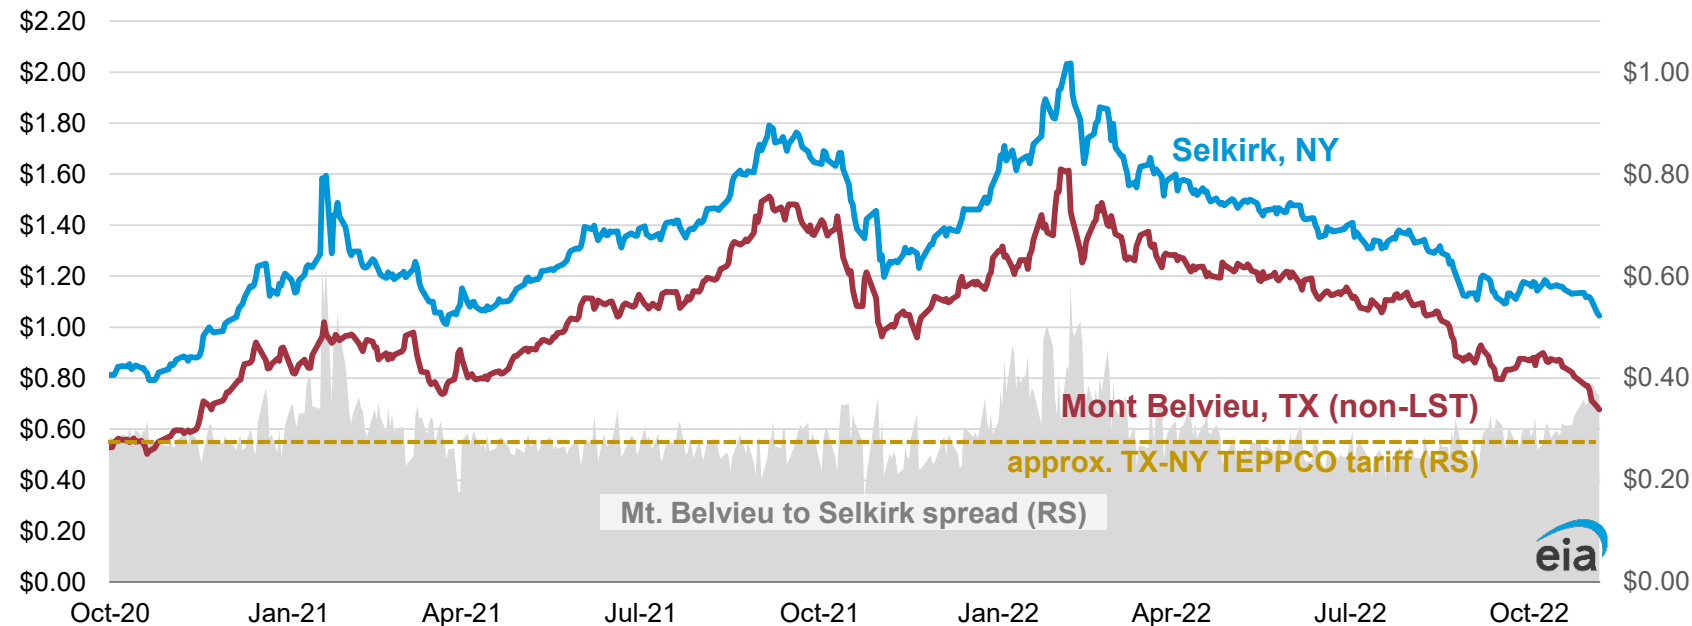

- NOAA forecasts below-normal temperatures in the western half of the United States, reaching as far as the Great Plains. Above-normal temperatures are expected in the eastern half of the United States, with the highest probability centered around the Great Lakes. Later in the forecast, cooler-than-normal temperatures could move further eastward.
- The cooler-than normal forecast across PADDs 4 and 5 are likely to result in above average propane demand for this time of year. The warmer-than-normal forecast in PADDs 1, 2, and 3 may decrease demand. Later in the forecast, demand may increase in PADDs 2 and 3.

Northeast propane prices, generally dictated by tariff on TEPPCO* pipeline, now at sufficient premium to draw waterborne imports

propane spot prices
dollars per gallon

propane price spread
dollars per gallon

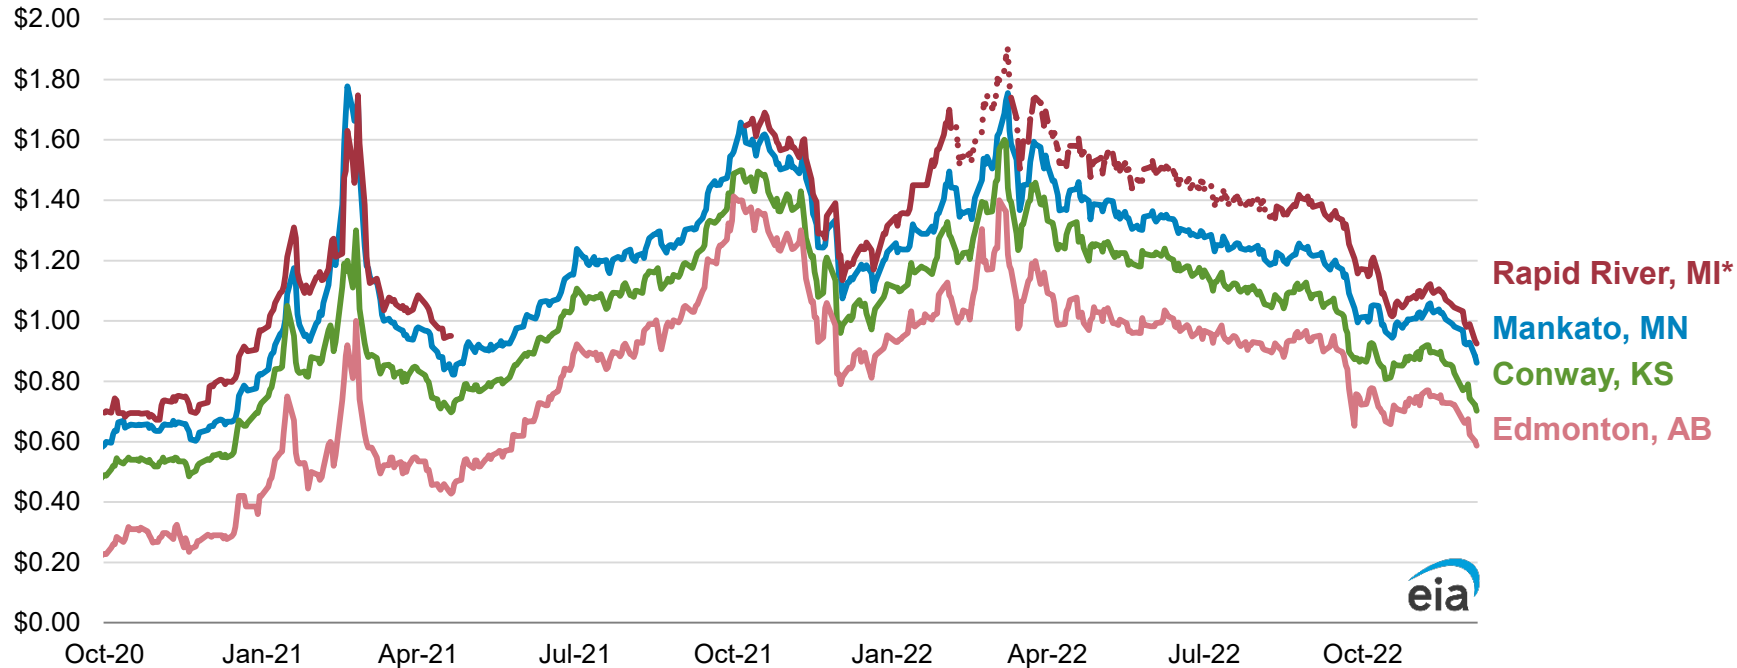

TEPPCO = Enterprise TE Products Pipeline Company LLC

Data source: Bloomberg, L.P., data through December 6, 2022; Enterprise Products Partners L.P., [Effective Tariffs](#), FERC No. 54.64.0

Prices at major Midwest market centers remain closely correlated with Conway

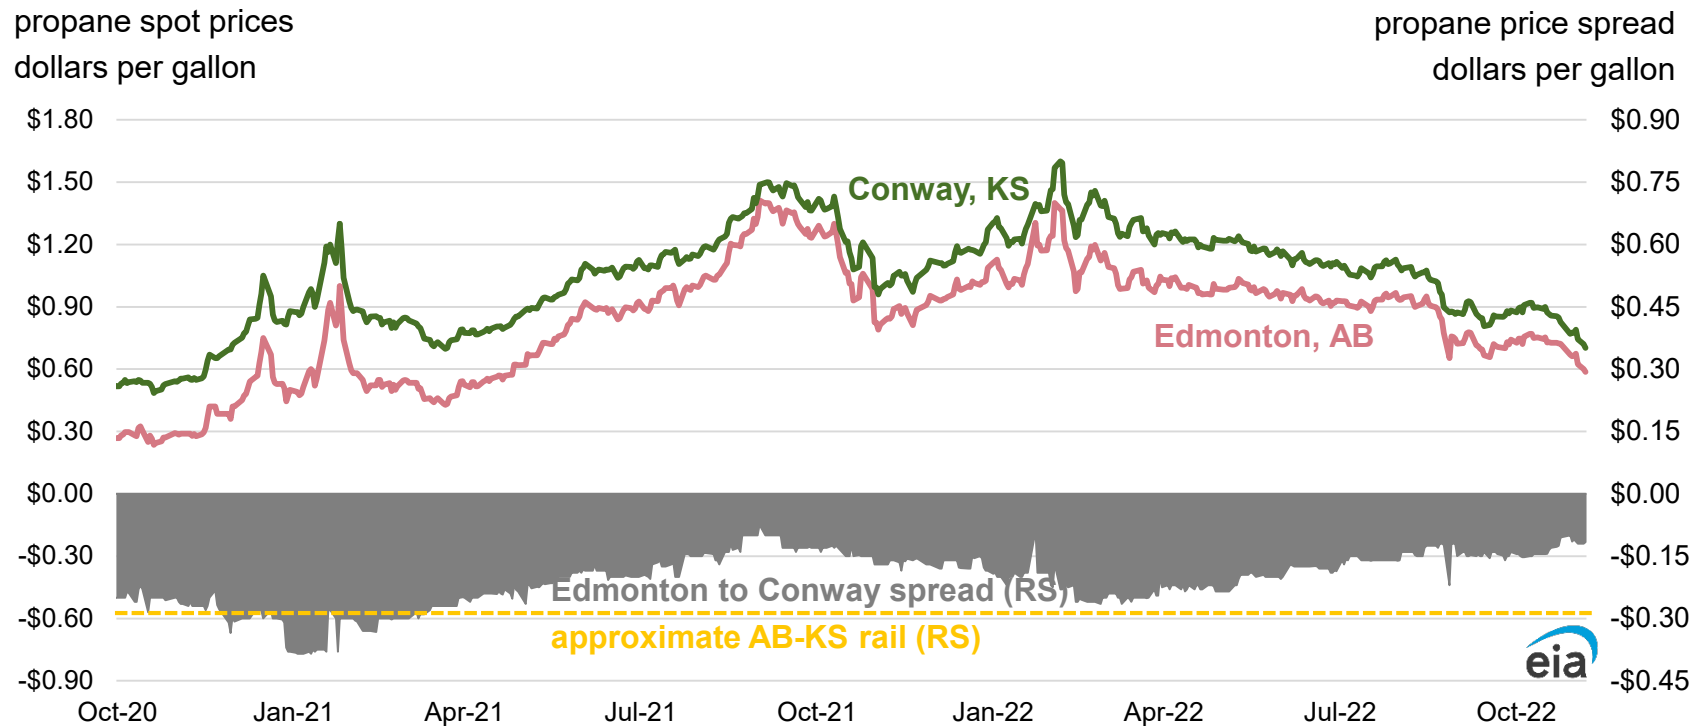

propane spot prices
dollars per gallon

Data Source: Bloomberg, L.P., data through December 6, 2022

*Rapid River, MI rack prices not consistently available during summer months

Declining premium for propane at Conway, KS relative to Edmonton, AB, now at ~12¢/gal, sufficient to cover rail shipments to few Midwest markets

Data source: Bloomberg, L.P., data through December 6, 2022

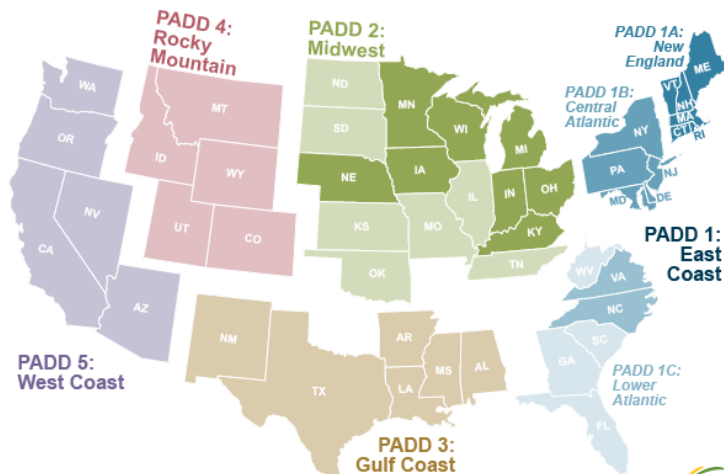

State Heating Oil and Propane Program (SHOPP) updates

- SHOPP is a collaborative program between states and EIA that provides weekly wholesale and retail prices for heating oil and propane at the state level.
- EIA expanded SHOPP in October 2014 to include 14 additional states in propane price data collection. In 2016, EIA added 10 new states to its wholesale propane price publication. This should be taken into consideration when comparing the average prices for the U.S., PADD 1, PADD 1B, PADD 1C, and PADD 2 averages.
- EIA has been providing more granular inventory data to states on a weekly basis since the 2016/2017 heating season.
- EIA implemented two new samples for residential heating oil and propane in October 2019. Under the new [sampling methodology](#), EIA is publishing [standard errors](#) for SHOPP prices.
