RE: Liquid Petroleum Gas Meter Registration

Dear Sir/Madam:

The Motor Fuel Metering and Quality (FMQ) Program was transferred to the Texas Department of Licensing and Regulation (TDLR) from the Texas Department of Agriculture (TDA) on September 1, 2020. Your company is listed as a facility that has at least one registered Liquid Petroleum Gas (LPG) meter.

In addition to registering your LPG meter with TDA, if your facility sells LPG for use as a motor fuel, your meters must also be registered with TDLR. If you do not sell LPG as a motor fuel, you are not required to register your meters with TDLR.

To determine whether you must register your LPG meters with TDLR, you must answer the following question. If you have more than one facility, you must respond to each letter per account. **If you fail to respond, your facility will receive a renewal invoice from TDLR prior to the expiration of your current LPG meter registration.**

**Does [REDACTED] (TDLR Acct # [REDACTED])
sell LPG for use in motor vehicles used over public streets and/or highways?**

☐ YES

☐ NO
