

WHO

Junior Achievement (JA) is the nation's largest organization that inspires and prepares young people to succeed in a global economy, plan for their future and make smart academic and economic choices.

WHAT

Our programs are centered on three pillars:

Financial Literacy
Work Readiness
Entrepreneurship

JA Reverse Shadow

JA Reverse Job Shadow® is a fun, interactive way to introduce middle and high school students to business professionals and leave them inspired to build a career and launch their own dreams. Bring along any "show and tell" items...business cards, brochures, touch and feel items...whatever depicts what you do with your job.

The *JA Reverse Job Shadow®* program requires a short time commitment from the volunteer and is a great way to connect with students.

Benefits

- Demonstrate the connection between academics and careers, motivating students to learn by making their class work more relevant.
- Introduce students to the requirements of professions and industries to help them prepare to join the workforce of the 21st century.
- Identify the next steps needed in their personal career preparation.
- Builds a pipeline of future entrepreneurs

Join Junior Achievement's national network of more than 213,000 volunteers and help students in your community connect the dots between what they learn in school and the "business of life"—work readiness, entrepreneurship, and financial literacy.
