Springfield, OH 45501*

What an incredible week of weather we have on tap! It's been a while since we had a stretch of 60's and 70's in quite a long time. Maybe even more important to us is the warm night time temperatures, which will encourage growth 24 hours a day. This is needed right now to push greens back to their normal, in-season conditions. We are still fighting some sand on a few greens, however by this weekend we should have improved considerably. In addition to mowing all surfaces with a limited number of team members, we will finish our pre-emergent crabgrass applications, finish spreading 70 yards of fresh mulch, and pressurize the irrigation system. We are starting to get a few more labor hours available to us as we begin to train new employees, and have a few returning after school is finishing up for the year. This will be a huge help as spring cranks up. I am still looking for a few more team members, including an operator for our rough mower. If you know of anyone who may be interested, please pass along our information. Thanks, we look forward to seeing you on the course, Go Bucks!
