**Coronado TV** is the City of Coronado's government access channel, a public channel which provides timely and informative content for the community. The channel offers programming 24 hours a day seven days a week, including two City Council, two Planning Commission, one Naval Complexes and three other live board, commission or committee meetings per month.

Operated through the City Manager's Office and a contract administrator, Coronado TV produces all the video and bulletin content. In addition to live meetings and rebroadcasts of meetings, Coronado TV also produces the City Manager's Weekly Update video and other special events, public service announcements and short features.

Coronado's local government channel provides enumerable opportunities for the City to broadcast public meetings and information to enhance our ability to attract viewership, become more open and engaged with citizens, and build trust through communication and transparency.

Please note that if a program runs longer than anticipated, the meeting immediately following it on the schedule will begin later than the published time. Scrolling text at the bottom of the program on Coronado TV will inform the viewer if a show is running long.
