TOTAL HIP REPLACEMENT:
Patient Selection & Screening

Sean Aiken, DVM, MS, DACVS

Total hip replacement can be a life-changing surgery for our pets who suffer from hip arthritis and injuries. This lecture will help the clinician identify candidates that may benefit from hip replacement surgery as well as preoperative testing required. The various hip replacement options will be discussed as well as how these implant options can benefit the patient. Postoperative care of the hip replacement recipient and potential complications will also be discussed.

Credit Hours: 1 CEU

Wednesday, June 5th, 2024

Boston West Veterinary Hospital - 5 Strathmore Road, Natick MA
