

It Takes a Community to Graduate a Child

The Clarke County School District's commitment is to graduate students who are in a position to succeed — they are ready to lead, become agents of change, and positively impact our communities.

We commit to community collaboration — engaging families, businesses, community members, and civic organizations as active partners to ensure every student has the opportunity to have an opportunity.

Our **Partner in Education** program matches community partners (corporate businesses, civic organizations, individuals) with specific needs within the district.

Adopt-a-School

"Adopt" a school by offering to provide a service – volunteer in a classroom, donate products, bring a team to complete a beautification project, support career days, or offer to have a class visit for a field trip. The opportunities are endless!

- ✓ Schools gain access to resources, expertise, products, funding, and volunteers to increase student achievement and help prepare students to be college and career-ready upon graduation.
- ✓ Partners forge strong connections within the community and make positive contributions by providing a range of resources and skills to strengthen students' academic and professional capabilities to be college and career-ready upon graduation.

If you/your company is interested in supporting a school:

1. Complete the [Partner Interest Form](#).
2. A representative from the Office of Community Engagement & Strategic Partnerships will contact you to discuss opportunities.
