

# Athens Community Corps Program

## Mission and Vision

Athens Community Corps leverages service-based partnerships to create opportunities for personal and professional development. We strengthen strategic relationships across our community through activities that build confidence, encourage well-being, and develop capacity in people to succeed. A-Corps graduates will find doors opened to previously inaccessible pathways and improved earning potential. Our residents and neighborhoods will experience greater connection than ever before through workforce development and community-building experiences that foster a healthier, more beautiful community.

## Program Summary

A-Corps will meet individuals where they are and provide opportunities, training, and mentorship through partnerships with ACCGov, non-profits, and local businesses. During the 11-month program, A-Corps team members will be exposed to a wide variety of projects and experiences that allow them to expand their potential and explore possibilities. Through their engagement in community projects, A-Corps participants will acquire knowledge, skills, and abilities most needed by local businesses and ACCGov. In addition, A-Corps projects will provide important civic improvements, helping improve and beautify community resources.
