

What ODFL Has Accomplished So Far in 2019

As of November 2019, ODFL completed 19 projects in 8 countries. They are serving more than 12,000 of the poorest people in the world *right now*. **Over their expected lives (3 – 30 years), they will deliver more than 100,000 people-years of help.** Since its founding in 2007, ODFL has completed 124 such projects in 15 countries.

	<p>Kenya: New classroom, Ngungu School</p> <p>We built a new classroom at Ngungu Secondary School. Previously, many students were attending class in the dining hall or outside under a tree. This large classroom will serve thousands of students. It will also be used for evening classes, and for community meetings and events as well.</p>
	<p>Ivory Coast: Water for KSP school</p> <p>ODFL installed a pump and piping to bring water the last half mile to the KSP school and the local community of 5,000 people. With running water, a daily meal will be cooked for the children, water-based science lessons will be taught, and a first-ever garden can be grown.</p>
	<p>Ecuador: Gravity water system</p> <p>We installed a centralized gravity water system to distribute potable water for the community of Piedra, including metered individual household connections. Previously water was carried by jugs from a nearby water source.</p>

Nepal: GEP Sewing Center

In partnership with our NGO partner, the Little Sisters Fund, ODFL funded the setup of a sewing center in Dang, Nepal. The center is producing washable sanitary supplies that ODFL purchases for \$5 per kit and then distributes free of charge to local girls. This is our Girls' Equality Project.

Kenya: Girls' Equality Project

We distributed thousands of Girls' Equality Project kits in Kenya this year. The kits cost \$5 but are free to the girls. They help the girls stay in school for three more years. Usually, that is long enough for them to be able to finish school.

Indonesia: Latrines

Working with East Bali Poverty Project, ODFL funded latrines for 33 families in the Belong hamlet. There are 131 people sharing the 21 latrines including 53 children. These latrines insulate the water supply from E.coli preventing sickness. They conclude a project of 96 latrine units.

Nepal: Birthing Center in Memeng

The town of Brevard, North Carolina funded construction of a birthing center in Memeng. This was our 12th such center in Nepal. These centers are reducing the number of mothers dying in childbirth by more than 90%, and the number of babies dying by more than 95%, according to data from the Nepal Ministry of Health.

Ivory Coast: Electricity for KSP school

The Karat School in the Ivory Coast did not have electricity. ODFL funded the installation of electricity to the school. Since it was installed, the school can now serve over 500 children on a weekly basis, with homework support, computer classes, and nutrition supplement programs.

Kenya: Water System at Ngungu School

There was no running water at the Ngungu School. Students had to carry five-gallon jugs from the river. A new water catchment system now collects and stores rainwater for the school's vegetable garden, for washing and for cooking. The system includes gutters to collect rainwater from the roof, and a 5,000 liter tank for storage.

Kenya: 30 Desks for Ngungu School

We bought 30 desks and chairs for the new classroom at Ngungu School. They were made to order by a local craftsman and cost \$50 per set. They are expected to last at least 10 years and serve thousands of secondary school students.

Nepal: Library for the Setidevi School

Stockdale High School in Bakersfield, CA funded the construction of a new room to be used as a library at the Setidevi Secondary School in Pharping. The school has 205 students and 21 staff. Last year, we provisioned the first-ever science lab at the school. This is their first-ever library.

	<p>Nepal: Playground area, Chunadevi School</p> <p>Students at three California High schools funded the construction of a 270 square meter assembly area for the Chunadevi Secondary School. The school has over 800 students in grades 1-10. The area outside had been dirt and a muddy mire during rain.</p>
	<p>Ecuador: Latrines and water supply</p> <p>With our partner, Green Empowerment, we upgraded the potable water system providing an additional well, additional filtration capacity, and new conduction infrastructure. We also constructed 15 composting latrines for the community of San Salvador benefitting 540 people.</p>
	<p>Nicaragua: Learning Resource Center</p> <p>Gahr High School helped refurbish a Learning Resource Center in Tipitapa. The center now offers reading campaigns, tutoring, crafts, drawing, computer classes, library services, a sanitation campaign, and sports. The goal is to build self-esteem, reinforce academic education, and build a sense of community. It's working.</p>
	<p>Nepal: Girls' Equality Project</p> <p>Since the Dang sewing center opened 6 months ago, it has made washable sanitary supplies and distributed Hundreds of them to girls in the surrounding areas. The recipients are also given education on female biology and feminine hygiene and how to use and care for the sanitary kits.</p>
