Take Back Your Time

Homesnap Showings
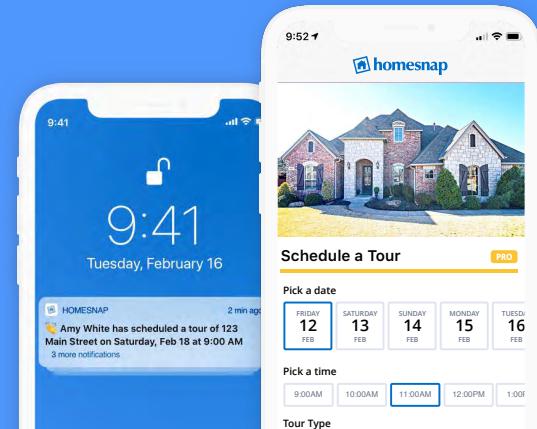

A Showing Tool You Can Trust

A modern showing tool for the modern agent, Homesnap Showings has complete feature parity with ShowingTime, but with a contemporary, agent-friendly design. Included with Homesnap Pro at no additional cost. Homesnap has a proven track record of building innovative, industry- and agent-friendly technology products. We will never become a competing MLS, brokerage, or iBuyer because it goes against our values.

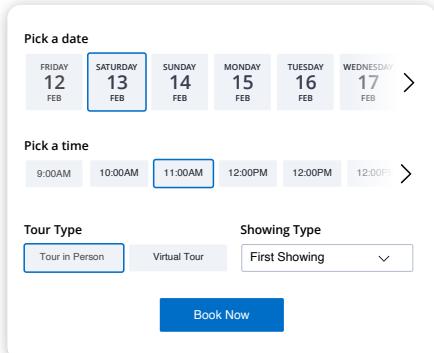

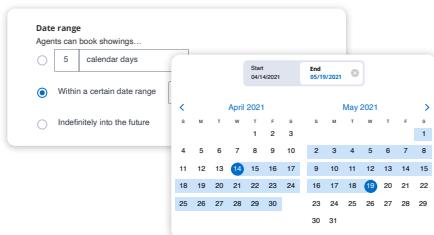

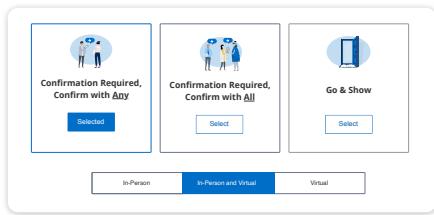

Customize Listings To Meet Your Needs

Simply set it and forget it. Because each property offers a unique situation, with clear and easy selections you can easily customize your listing settings and availability. Enable buyer agents to see everything they need to book and to have a successful showing.

Instant Bookings

When a buyer's agent finds a time that works for their client, they can instantly book it. If you require approvals, Homesnap Showings will hold the reservation even before approval to avoid double bookings.
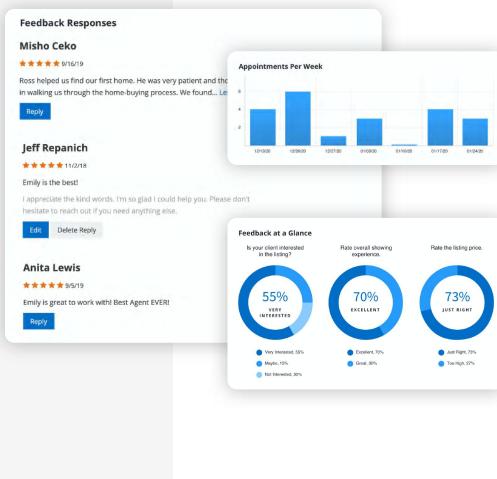

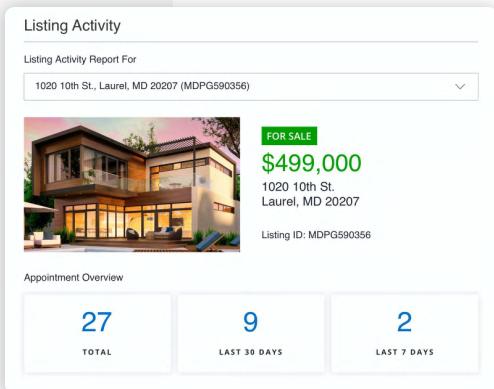

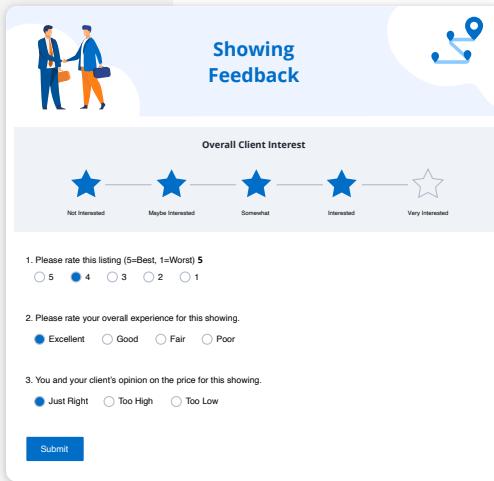

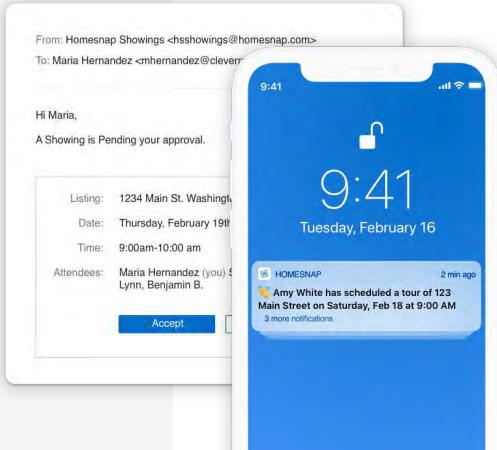

Manage Approvals From Anywhere

Being flexible has never been more important. Whether in your car, at a showing, or at your desk, you can approve or decline showing requests directly from notifications on your preferred device.

Get Feedback Without All The Follow Ups

No more "I wonder what they thought?". Pre-set your questions and when the showing ends the buyer's side will be automatically reminded to provide feedback. Strategically timed, automatic reminders increase responses from the buyer's side.

Gain Deep Insights At A Glance

With a fresh new look, reports are easier for you and your sellers to understand. You can easily digest information at a micro listing level to the overall activity level. Get instant insights on showing activity to better inform your listing strategy.

A simple but comprehensive view of all your listings feedback in one place. Control and share feedback notes with your clients and validate your recommendations.
