

10 Quick Fixes To Improve Your Website

- 1 Compress and Optimize Images:**
Reduce load times by compressing images without losing quality.
- 2 Update Your Meta Descriptions:**
Refresh your meta descriptions to be more engaging and keyword-rich for better SEO.
- 3 Fix Broken Links:**
Use tools to find and fix any broken links that can hurt user experience and SEO.
- 4 Add Social Sharing Buttons:**
Make it easy for visitors to share content, increasing your site's visibility.
- 5 Implement Favicon:**
Add a favicon to enhance your brand's professionalism and recognizability in browser tabs.
- 6 Improve Contact Forms:**
Simplify contact forms to increase submission rates by asking only essential information.
- 7 Add a Google Maps Widget:**
For businesses with a physical location, integrating Google Maps improves credibility and accessibility.
- 8 Create a FAQ Section:**
Address common questions to improve user experience and reduce customer support queries.
- 9 Optimize Call-to-Action Placement:** Test and move CTAs to higher visibility areas to improve conversion rates.
- 10 Review Page Titles for SEO:** Ensure your page titles are unique and include main keywords, reflecting the content accurately.
