BTD Manufacturing employees thrive in a growing, unified, state-of-the-art company

“Technology is critical to our success as our customers expect us to be a manufacturing leader in the metal fabrication marketplace,” said Gintner. “Every part of BTD gives you access to the latest and greatest technology used in the industry.”

A recent BTD video on the company’s LinkedIn page shows people doing their work with pride and precision. Employees have many good things to say about BTD and exemplify the “One BTD” philosophy that is key to the company’s success.

BTD Manufacturing in Lakeville has plenty of jobs for people who want to work with their hands, hearts and brains in a modern, efficient, growing company. You’ll be involved with making products used by some of the best companies in the world.

BTD provides customized metal fabrication, forming, welding, tool and die work, machine, powder coating, prototyping, stamping, cutting and more.

“If you want to be part of a fast-paced, high energy, ever-growing business, contract manufacturing might be the place for you,” said Paul Gintner, president of BTD. “Not only will you make cool parts at BTD, but you can also grow a career in all areas of our business.”

BTD often is looking for people who have math and measurement skills, machining, welding, tool and die as well as forklift experience. There usually are openings for production operators, welders, material handlers and toolmakers are in high demand.

But then again, the company likes to help employees grow their careers in all areas of the business like sales, accounting, quality, HR and operations, too.

“We offer a variety of career paths for people to choose from based on their skill set and passion,”

said Jen Gadiant, manager of human resources. “Some may require additional education while others may require building additional skill sets while on the job, and we offer in-house training and tuition reimbursement.”

Much of BTD’s success is dependent on technology and software for state-of-the-art equipment that employees learn to run so the company can operate more efficiently and meet customer expectations.

“We take pride in what we do here and try to be our customer’s first choice by doing things right, fast and easier,” said one employee. “I love working for BTD, I love the opportunities that have been bestowed upon me, and I’m looking forward to the future.”

Another employee said “It’s exciting to me to make a difference for customers, for BTD and even personally. That opportunity drives me and I’m excited to come to work.”

“I like being part of something that’s always growing and developing,” said a third employee.
