CAP is Moving to Absorb LMS

As part of Civil Air Patrol's commitment to continuous improvement and supporting the remarkable growth of our organization over the past few years, we are thrilled to unveil our new learning system, Absorb LMS!

Exciting Features Include:

- Transfer of prior online completions so that records and transcripts are accurate.
- Retaking courses is significantly improved via the reenroll button on available courses.
- Start moderated modules at any time without needing to request a cohort.
- View and sign up for any available Virtual-In-Residence course sessions.

This transition signifies a pivotal moment in our journey, equipping us with advanced tools to enhance skills, foster innovation, and drive collective success.

To Prepare for this Exciting Change:

1. Stay tuned for upcoming training sessions and resources on using the new learning system.

2. Complete any unfinished online learning materials. All of your fully completed course work will be transferred to Absorb, but any unfinished or in progress work will not be moved over. Please complete any in-progress work.

3. Download and save a copy of your current online course transcript. This is a precautionary step to ensure confidence in what was transferred. This migration will not affect your eServices progress, and no completion data there will be affected.

Get ready to embark on a transformative learning experience that will elevate our capabilities and propel us toward even greater achievements. Absorb LMS will launch in the summer of 2024. An official date will be announced soon.
