California Initiative to Advance Precision Medicine (CIAPM): 10 Years of Impact

CIAPM supports biomedical and health research that harnesses data to develop new diagnostics, treatments, and preventative tools to reduce health inequities and advance whole-person care. State investments have resulted in scientific advancement, workforce development, lasting partnerships, and sustained research and care programs across California.

SCAN ME

Across 21 projects and 10 years, CIAPM has awarded...

$49 Million

to complete initial project goals

CIAPM researchers have attracted additional funding...

$102 Million

from private sector, philanthropic, institutional, and federal awards

~2x Return on State Investment

CIAPM-funded projects have leveraged initial state investments to attract substantial additional funding, extending the scale and longevity of California's research and community impact.

CIAPM-supported research has led to...

High-impact scientific products that accelerate discovery, disseminate new data, and translate precision medicine research into clinical and community settings, revolutionizing medical practices.

- **315** peer-reviewed publications
- **544** presentations at academic conferences
- **86** press articles
- **6** patents
- **11** clinical trials
- **33** validated technologies or approaches
- **14** new web resources and toolkits

CIAPM grantees are developing the biomed workforce...

By training and mentoring researchers and care practitioners, building California's precision medicine capacity.

Mentored

220 students, fellows, and community health workers

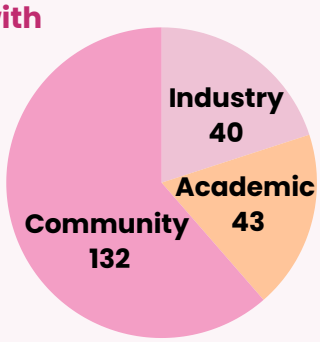

Developed

13 novel curricula or training programs

CIAPM grantees have established ...

partnerships with

216 organizations across sectors

These Innovative and long-lasting partnerships support equitable research, translation, and implementation of precision medical practices.

Californians engaged

222,585

participants in direct study

10,085

people screened/ tissues analyzed

212,500
