

SAN FRANCISCO FIRE DEPARTMENT

MEDIA RELEASE

San Francisco Fire Department disaster water supply demonstration

San Francisco CA- The San Francisco Fire Department will provide a demonstration of its new Rosenbauer Hose Tender and our Auxiliary above-ground water supply system.

The Rosenbauer Hose Tender is designed to address potential water supply issues that may occur during a large-scale conflagration or after a seismic event. It will be utilized to supply a 5" above-ground water main system or to apply water directly to a large fire in the event that the domestic water supply is compromised. The Hose Tender is just one of many redundancies that the SFFD can use to ensure a water supply during exigent circumstances. It will be used to draft water from Lake Merced, Spreckels Lake, Stow Lake, or the San Francisco Bay. The three new Hose Tenders will be instrumental during a large-scale emergency response.

WHAT: Demonstration of the Rosenbauer Hose Tender and the 5" above-ground water main system

WHEN: February the 29th
11:00 AM (Anticipated end time of 1:00 PM)

WHERE: Lake Merced Boat Ramp, 1 Harding Road, San Francisco ca. 94132

LOGISTICS: The public, dignitaries, and media are invited and encouraged to attend this free event. Public parking is available in multiple locations in the immediate area. As it may be cold, please check the weather before attending and consider appropriate attire. This event will occur rain or shine.
