

**WHAT'S THE WORST
KIND OF PROSTATE
CANCER?
THE AGGRESSIVE
KIND THAT GOES
UNDETECTED.**

**Mount
Sinai**

Before we can treat cancer, we first have to find it. That is why we've developed an innovative program that combines urology, pathology, medical oncology, genomics and radiology to identify and treat aggressive cancers that might otherwise go undetected. **Which hospital you choose can make all the difference in the world.** mountsinai.org
