

# Developmental Services

## Early Support for Growing Minds

Early identification and support help children reach important developmental milestones. We provide screening, resources, consultation, and strategies for children from birth through age five.

## Developmental Screening

Annual screenings for children birth to five enrolled in the School Readiness Program help identify potential delays, track progress, and celebrate milestones. **ASQ®-3** and **ASQ®:SE-2** tools are used, with results shared with parents.

## Warmline

Consultation, technical assistance, and training for child care staff, including support with development, social-emotional needs, curriculum, teaching strategies, environments, and developmental needs or disabilities.

## Need Support?

- Parents and providers can contact us by email, phone, or through the **Warmline Request Form**.
