Transition – The movement of major growing areas from California to points as far south as Yuma, Arizona is underway, and will continue through late November. This is a time when certain crops are more susceptible to disruptions in supply and quality. **Check your in-box or reach out to your account manager** for up-to-date information and product recommendations.

Broccoli/Cauliflower – High temperatures in California's growing regions have tightened up supplies and created minor quality issues such as bruising and yellowing. Pricing is higher than normal.

Lettuce – The extremely warm weather has also affected lettuce quality. Iceberg and Romaine in particular. Pricing is higher than normal. **Green Leaf, Locally-Sourced, and Value-Added are currently the best value.**

Melons – Supplies of **Cantaloupe** and **Honeydew** remain very tight, due to field transition in California and the recent cold snap in Arizona. Pricing is higher than normal; good quality reported.

Potatoes – An unusually early winter storm in Idaho has slowed both harvesting and transport of all baking potatoes. Pricing is slightly higher this week, with 80CT and smaller sizes being the best value.

A Peek at Peak Seasons

Apples – All Autumn varieties are in season.

Sweet Potatoes – Excellent quality and good supplies.

Oranges – Late-season Valencia Oranges, Mandarins, and Grapefruit are all very nice quality. New crop Navel Oranges will become available in early November.

Kale – Quality is very nice, with full bunches and good color.

Autumn Squash – Acorn, Butternut, Spaghetti, and other hard squashes are in season.

Raspberries – Quality is excellent on the Mexico harvest, with plentiful supplies and good pricing.

Weather Update

California: Very warm temperatures with gusty "Santa Anna" winds throughout the southern and desert regions.

Mexico: Seasonal temperatures and precipitation in all growing areas.

Florida – Slightly cooler temperatures and dry conditions.
