

# We Make The Future Clear

## Profile

Hubs in: UK, Spain and Argentina  
Expected growth: 535 % in 2022  
Industry: Energy, Robotics & Artificial Intelligence  
Product type: Data as a Service  
Foundation date: 2018  
Team members: +30  
Raised Capital: 1.5MM  
Pre-Capital value: 10MM

## Our Proposal

We are a Climate Tech company that provides preventive, accurate, and actionable data to the **energy industry**.

We guide conventional energy sector companies through the dynamic energy transition, and assist clean energy companies in **optimizing their operations**

## Management Team

Ian Bogado, CEO

Amelia Bálsamo, CTO

Diego Montesano, CMO

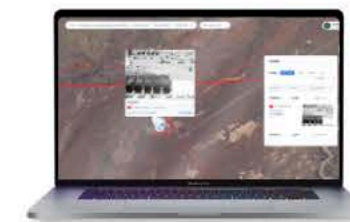

## How does it work?

- 1 Automate devices inspect the facilities **collecting information**.
- 2 The data is uploaded to the cloud and **analyzed using artificial intelligence** to detect patterns and events.
- 3 Customers have access to our **platform** with relevant, actionable, and processable information to monitor their assets.

## Software as a Service

We combine robotics, artificial intelligence and connected devices into a deeply integrated **Platform** with data delivery solutions.

We **reduce maintenance times and costs**, identifying risks and generating reports.

## Our Clients

## Our Milestones
