

Join Project ECHO for Heart Failure Discussion and Case Reviews

By Doug Sawyer, MD, Chief of Cardiac Services, and Esther Shao, MD

The care of heart failure patients can be challenging. To help you address specific challenges and to build your expertise in heart failure care, the MaineHealth Cardiovascular Service Line is rolling out a new education and consultation forum. Cardio Project ECHO will connect you and your colleagues, on a monthly basis, with a panel of heart failure experts for discussion and case reviews.
