

Digital Signage Advertising

We are offering a NEW member benefit! Digital signage is an electronic display platform that allows you to showcase dynamic content, such as videos, images, and text, in real-time. This makes it an ideal tool for promoting events, news, and important announcements to the community.

We want you to have an opportunity to showcase your business to the Valley City community! Whether this is an upcoming sale, event, or job opening, we want to have the ability to have it running for people to see. We will be placing a TV in the Chamber and DMV office for our customers to see!

Pricing

With your Chamber Membership, you are able to have **two** free advertisements on the TV. After that, you can have a full screen advertisement for \$10. All ads run for a month.

Sizing & Designing

The best sizing for the advertisement is 16:9 [widescreen] or 3840px x 2160px. If you need help designing the ad, please reach out to Maria at the Chamber. *Examples can found below.*
