

Pork Belly Ventures Ride With GPS for RAGBRAI LII

Or

How Am I Going To Find Pork Camp Without Signs?!?

Overview

- Setup – before coming to Iowa
 - RWGPS App
 - Free RWGPS account
 - Join PBV RWGPS Tour Operator account
 - Join PBV RAGBRAI Event(s)
 - Save PBV campsite-to-campsite RAGBRAI Route(s)
- Start Navigation
 - Select the nearby, saved route
 - Navigate

First: you'll need RWGPS and a free account

- **RWGPS Account:** go to [RWGPS](#) and create a free account.
- **App:** download RWGPS app from [App Store](#) or [Google Play Store](#)

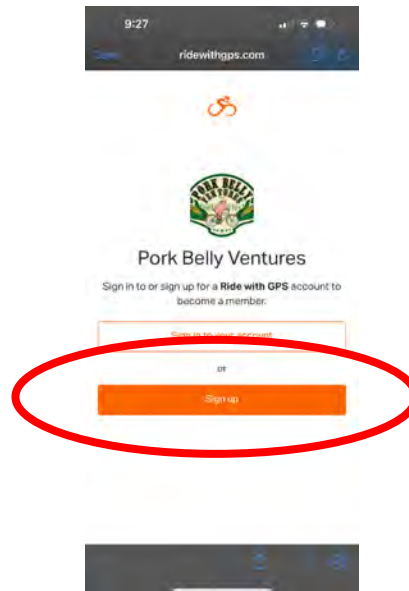

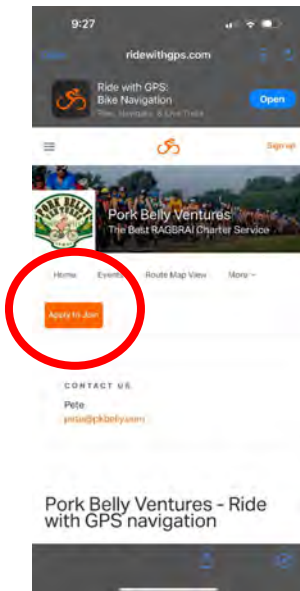

Join Pork Belly Ventures RWGPS

- **Join Charter:** [join PBV Tour Operator account as a member.](#)

This provides you the ability to download routes and get turn by turn directions. PBV has paid for you to have those privileges.

- If you've followed the links shared, you should be automatically approved into the Pork Belly Ventures RideWithGPS account.
- If not, your membership will be pending approval from me or another administrator.

Join your event(s)

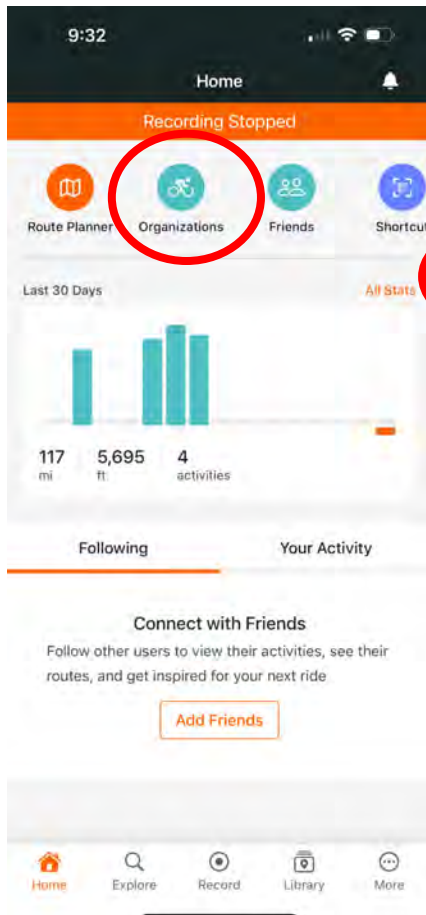

- **Join the event(s)** you are participating in.

Groups of routes are organized into events. Click event link → RSVP
Your RSVP will allow for you to be notified should the routes change.

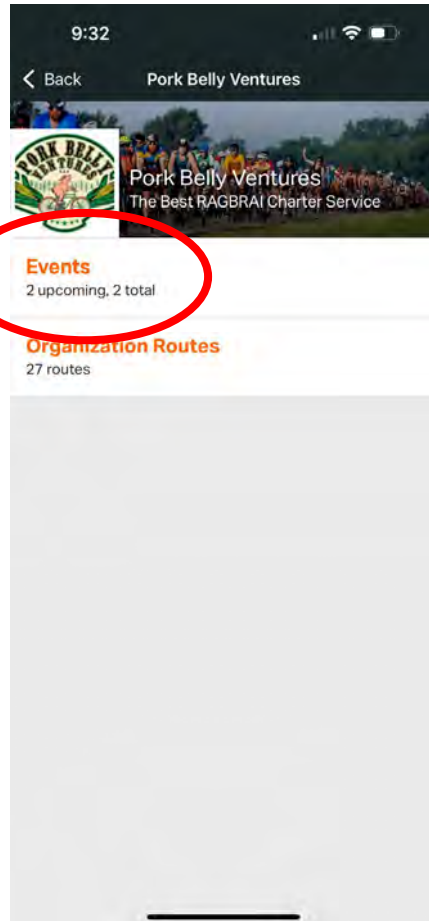

- [Pre-RAGBRAI Tire Dip](#): 2 routes – an out & back from PBV camp to the tire dip site at Oak Grove County Park, and the return route from Oak Grove County Park.
THIS IS NOT A SANCTIONED ROUTE – USE AT OWN RISK
- [PBV RAGBRAI LII Road](#): Consists of 8 routes (two for day three, century and not). These routes go from PBV campsite to PBV campsite.
- [PBV RAGBRAI LII Gravel](#): Same as above, with all the gravel segments.

Downloading Event Routes or Individual Routes

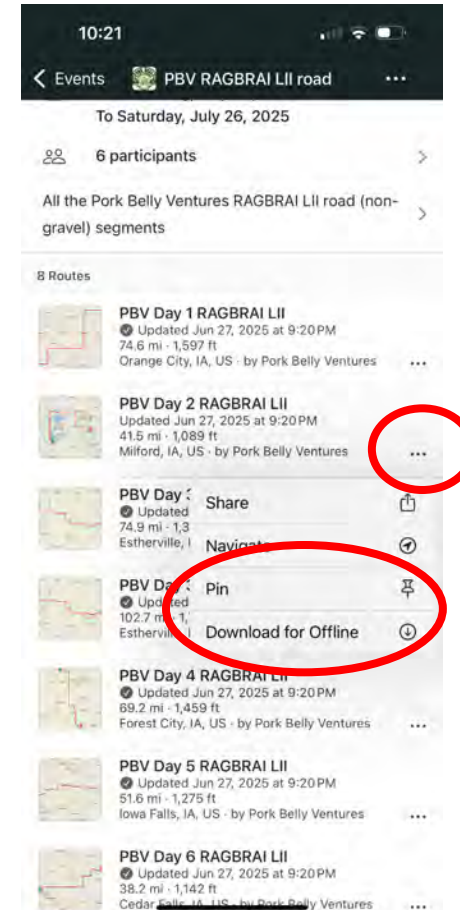

Three dots - Download

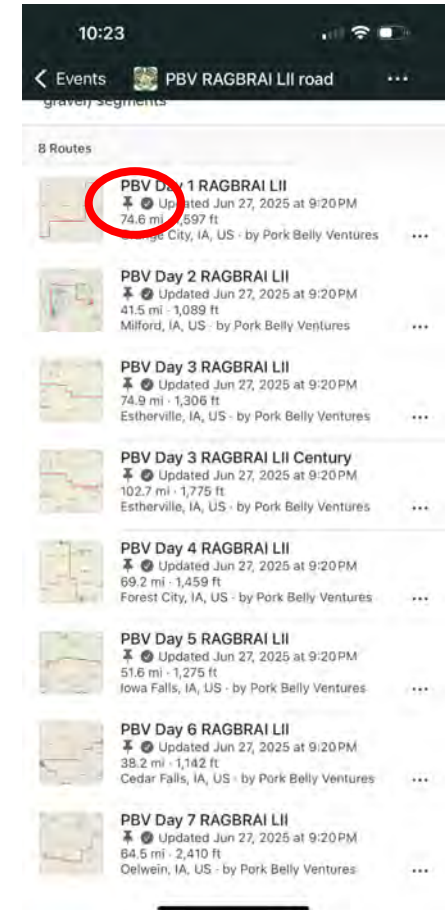

Download

Or individual routes

Pin and checkmark

Why download routes in advance?

- If you don't have a cyclecomputer (to which you can pin your route instead), you'll want to download your routes.
- If you have downloaded your routes, you will not need cellular signal... and we know that cell signal is questionable during RAGBRAI.
- These download at about 35 miles per minute.
The set of either road or gravel is about 517 miles. Don't worry – that's if you do both the regular day three AND the century... that's your choice.
- On strong WiFi, that's about 15 minutes of downloading. Let's not think about what it would be over cellular data in Orange City on July 19... which is why we encourage you to download these now.
- If you do have a Wahoo, Garmin, Hammerhead, or other RWGPS compatible cyclecomputer, you can pin your routes and sync to your cyclecomputer to follow the routes there.

That's it – you're ready – see you in Iowa

Day of Event – Starting Navigation

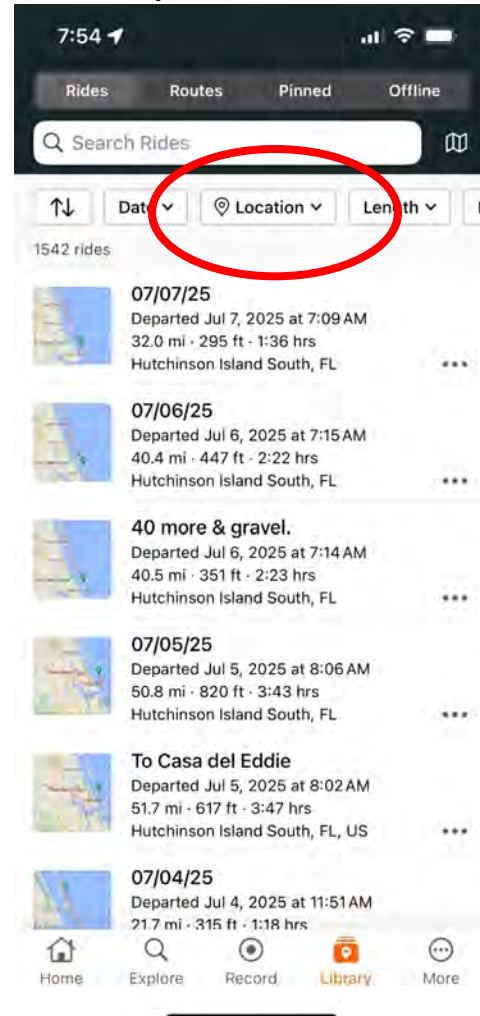

- Thinking ahead – it's Sunday morning July 20.
- You have all your routes downloaded, and now it's go-time. What do you need to do to navigate?
- Open the RWGPS app on your phone, and choose Library.
Choose to sort by location, then nearest.
Choose the three dots next to your desired route, and click Navigate.
- If your phone's volume is up, you will hear navigation start, and as you ride you'll hear announcements such as caution for tracks, turn left at 120th street, etc, all the way to your next campsite.
- If you find yourself offroute, you'll hear a discordant ding; if you pull out your phone you'll see an option to return to the route.
- Final note: you can put your phone on battery save if desired without impacting the navigation – it'll keep you on track.
