

Pork Belly Ventures has chosen to provide RideWithGPS (RWGPS) routes for RAGBRAI LII.

If you have a bike computer (Wahoo, Garmin, Hammerhead):

- This will allow you to pin routes and have them appear on your bike computer.

If you prefer to navigate by phone:

- This will let you download the route to your phone and receive turn-by-turn navigation from campsite to campsite with no need for cell signal.

1) RWGPS Account: go to [RWGPS](#) and create a free account.

2) App: download RWGPS app from [App Store](#) or [Google Play Store](#)

3) Join Charter: [join PBV Tour Operator account as a member.](#)

This provides you the ability to download routes and get turn by turn directions. PBV has paid for you to have those privileges.

4) Join event(s) you are participating in.

Groups of routes are organized into events. Click event link → RSVP

Your RSVP will allow for you to be notified should the routes change.

- [Pre-RAGBRAI Tire Dip](#): 2 routes – an out & back from PBV camp to the tire dip site at Oak Grove County Park, and the return route from Oak Grove County Park.

THIS IS NOT A SANCTIONED ROUTE – USE AT OWN RISK

- [PBV RAGBRAI LII Road](#): Consists of 8 routes (two for day three, century and not). These routes go from PBV campsite to PBV campsite.
- [PBV RAGBRAI LII Gravel](#): Same as above, with all the gravel segments.

5) Saving Routes: pin (for cyclecomputer) and/or download (for phone) your routes.

- Download: On the event page on your phone, you can choose to download routes. This will store all the routes in that event onto your phone, for offline use.

Click the three dots in the upper right; click those, then Download Routes.

- To download individual routes, click the three dots by the route instead.

- Pin: click the three dots next to each day's route, then choose pin. Then, given that you've authorized your cyclecomputer for RWGPS, you will update your routes and see those you've chosen. For Wahoo, that's via the Sync function on the Routes page.

Download RWGPS App

Day of Event – On your phone, go to your route library on the RWGPS app, choose Offline, sort for location, choose nearby, and today's route should rise to the top. Hit the three dots to the right of the route, and click "Navigate". Turn media volume up to hear spoken directions.
